Select the requested term that the course will first be offered. Selecting "Earliest" will allow the course to be active in the earliest term after SCNS approval. If a specific term and year are selected, this should reflect the department's best projection. Courses cannot be implemented retroactively, and therefore the actual effective term cannot be prior to SCNS approval, which must be obtained prior to the first day of classes for the effective term. SCNS approval typically requires 2 to 6 weeks after approval of the course at UF.

Response:
Fall

Effective Year
Select the requested year that the course will first be offered. See preceding item for further information.

Rationale and Placement in Curriculum
Explain the rationale for offering the course and its place in the curriculum.

Response:
Veterinary forensics is a relatively new field in veterinary medicine and society has an expectation that veterinarians will be active members in helping to identify cases of suspected animal cruelty and neglect. The University of Florida is a leader in the area of Veterinary Forensics both nationally and internationally. Currently UF has several online veterinary forensic programs but has on a single on campus Course available to our students. This on-campus course is designed to allow veterinary students to improve their knowledge of veterinary forensics. Ultimately this course will allow them to improve their ability to identify cases of suspected animal cruelty in both small and large animals using the forensic postmortem examination, improve their documentation skills, and develop their ability to be an effective witness as the case progresses through the criminal justice system. Students will build on the foundational elements learned in the Veterinary Forensic Medicine (VEM 5324) course. The addition of this course to the veterinary curriculum will not only allow for our students to continue to advance their knowledge of veterinary forensics but it will also allow us to highlight our training of this next generation of veterinarian to perspective veterinary students in this rapidly growing field. Veterinary Forensic Pathology will contribute to the departmental goal of academic excellence and will also lead to interdisciplinary teaching within the University.

Course Objectives
Describe the core knowledge and skills that student should derive from the course. The objectives should be both observable and measurable.

Response:
1. Be able to describe the role and importance of the veterinarian performing a forensic postmortem examination.
2. Explain how to properly document forensic autopsy findings.
3. Explain the different types of postmortem imaging modalities.
4. Be able to discuss how to work up different types of forensic cases including fire related death, animal sexual assault, and animal attack cases.
5. Describe how to how to collect samples for forensic DNA testing.
6. Discuss the different ways we can estimate the postmortem interval.
7. Discuss the basic components of the U.S. criminal justice system and the different types of witnesses.
