Rationale In the updated 2018 curriculum, students complete BME4409 in senior fall rather than junior fall. BME3508 became a required course in the new curriculum. Students may complete this course earlier if they meet the prereqs but it is necessary for them to have knowledge from BME3053C and BME3508 prior to enrolling in BME4409. MAP2302: Differential Equations was removed as a prereq from BME4409 because MAP2302 is a coreq for the two of the other prereqs for BME4409, which are BME3060 and PCB3713C, respectively. MAP2302 is also a critical tracking course. Students may not progress in the curriculum until all critical tracking courses have been completed.
