TOTAL CREDIT HOURS 107

**Proposed Curriculum Changes** The proposed change would take the two four credit courses from Year 2 Spring (OTH 6635 and OTH 6641)

and move the content into three new courses (noted below at OTH 6xxx).

The new courses would be consistent with our curriculum design, which focuses on occupation-based practice in rehabilitation

and how occupation-based practice supports participation and health. Adult-related content in these areas is taught in the fall

and the new courses would teach the child-related content in the spring. Clinical skills for children will be taught in OT Clinical Skills 3.

There is no change in credit hours as the previous 2 courses (OTH 6635 and OTH 6641) are being replaced by the 3 new courses.

Year 2 Spring

OTH 6xxx OT Clinical Skills 3 2

OTH 6xxx Occupation-based Practice and Rehabilitation: Children & Youth 3

OTH 6xxx Occupation-based Practice, Participation, and Health 3

OTH 6812 Pediatric Level 1 Fieldwork 2

OTH 6726 OT Service Delivery and Organization 2

OTH 6906 Doctoral Mentorship 1 1

Total 13

**UF Online Curriculum Change** No

**Pedagogical Rationale/Justification** As part of our self-study, in preparation for accreditation for the Doctor of Occupational Therapy program, the faculty created a new curriculum design that linked the adult rehabilitation, adult participation, and adult clinical skills content to parallel content taught for children and youth. This approach will allow students to more easily link content from one population, age group, and setting to another across semesters. Our faculty will be able to thread the themes of human occupation and health, critical thinking for practice and scholarship, and psychomotor skills across the curriculum because content will now be linked by similar course objectives, organization, and assignments.

**Impact on Enrollment, Retention, Graduation** There is no impact since the credit hours will not change by replacing of the old courses (8 credits) with the new courses (8 credits).

**Assessment Data Review** Develop and implement scientifically and theoretically-sound, evidence-based occupational

therapy programs and practices that incorporate an ecological perspective of human health. (Theme: Human Occupation and Health)

**Academic Learning Compact and Academic Assessment Plan** No modifications needed.

**Catalog Copy** Yes
