

I am a Senior Lecturer in Agricultural & Biological Engineering (ABE), where I currently instruct classes for both the Biological Engineering and Agricultural Operations Management programs. I serve as the advisor for the Florida Student Branch of American Society of Agricultural & Biological Engineers (ASABE).

Professionally, I have served on the Executive Board for the Florida Section of ASABE. I serve on several international committees within ASABE, including in committee chair and vice chair positions. Within the ABE Department, I am on the Curriculum and Awards Committees. I also am on the subcommittees relating to ABET (Accreditation Board for Engineering and Technology), the Biological Engineering Curriculum. I am also Program Evaluator for ABET.

I serve UF as IFAS/CALS Senator, as a member of the Infrastructure Council, the University Curriculum and ROTC Committees, and as the Chair of the University Constitution and Regulations Committee. As chair, it has been a privilege to work with the Steering Committee, and the Committee on Committees.

If elected as chair-elect, I promise to be a strong advocate for the faculty to our stakeholders, and to represent the faculty to the Advisory Council of Faculty Senates, and the Board of Trustees. I will work to improve faculty participation in shared governance and build upon efforts to modernize and improve support systems for the Senate and the faculty. Since graduating from UF, it has been a privilege to be a on Faculty, and I am humbled by this potential opportunity to continue to serve with your support.
