Museology

College of Fine Arts

2012-13 Certificate Assessment Plan

A. Rationale

The certificate in Museology at the University of Florida meets the needs of current graduate degree seeking students who wish to add a museum component to their current degree program in order to better understand museum professional practices and to expand their employment options. The certificate provides a curriculum for students who wish to be trained in core museum practices and therefore would be in a strong position to meet future employment challenges and opportunities in wider fields based on their experience through a Museum Studies concentration.

B. Mission

The Museology Certificate builds on the interdisciplinary nature of museums and enables students to have a broad knowledge of museum practices. Through the study of museum issues, audiences, resources, responsibilities and obtaining skills needed for museum jobs, students The Certificate in Museology supports the school's mission: "Our comprehensive curriculum provides superior instruction in the areas of studio art, design, art education, art history, and museum studies, and also prepares students for advanced study or potential employment in art related fields as diverse as museum operations, advertising, information graphics and production, and arts management." (School of Art + Art History [Mission Statement](#)). The Certificate in Museology supports the college's primary mission to "The College also offers substantial general education and service courses to non-arts majors and intends to continue this service in the coming years." (College of Fine Arts [Mission Statement](#)). The program supports the University of Florida mission to "to lead and serve the state of Florida, the nation and the world by pursuing and disseminating new knowledge while building upon the experiences of the past...to advance by strengthening the human condition and improving the quality of life." (University of Florida [Mission Statement](#)).

C. Student Learning Outcomes (SLOs)

F. Methods and Procedures

Both direct and indirect measures would be taken into account.

Methods:

During the fall review and analysis cycle, the faculty teaching in the certificate program will review the DIRECT and INDIRECT DATA as they best determine, answering key questions such as:

What does the data show us about each individual SLO?

And

What changes do we want to make, based on these observations?

Should there be observations that lead the faculty to consider revisions, the faculty would have the options to

- *change the SLOs and ALC

- *change the data collected (assignments, etc.)

- *change the curriculum

DIRECT DATA: The faculty will randomly sample actual student work from designated courses, in a variety of formats, based on projects and assignments from those courses. The faculty will develop appropriate rubrics based on the nature of the student samples. Samples will be collected based on recommended sample sizes according to the number of students in the program.

INDIRECT DATA: The College of Fine Arts Dean's Office will collect institutional data for the program, including but not limited to statistical data such as enrollment, grade distribution, recruitment and retention patterns. An additional source of data, the biennial SERU data, will be collected from the University of Florida Office of Institutional Planning and Research.
