Modify Graduate Academic Assessment Plan

Academic Assessment Plan Modifications

Response:
Rationale

Description and Rationale

Briefly describe the modification(s), including the revised language, and provide the rationale/justification for the revision. Templates are available for the curriculum map, assessment timeline, and assessment cycle on the [Institutional Assessment website](#).

Response:

We are requesting the modification of the program goals to more effectively align with our academic mission and the rigor of our academic program. The previous goals were as follows: 1 Increase the number of students in the Master's program and 2. Maintain and continue to improve the quality of the program. We wish to change our program goals to: 1. Provide quality core courses that furnish foundational knowledge, skills and abilities in applied physiology and kinesiology. 2. Provide quality elective courses that result in strong discipline specific knowledge, skills, and abilities in areas related to career interests of the students. 3. Ensure quality internship experiences that allow students to apply foundational knowledge, skills, and abilities and to further develop critical thinking and communication skills and multicultural sensitivity under the supervision of field experts in a variety of settings. 4. Revise HP MS curriculum and degree requirements to better reflect the changing needs of the profession. 5. Increase the quality and quantity of applicants to our programs. 6. Maintain and continue to improve the success of the program.
