## Academic Assessment Plan for Ph.D. in Rehabilitation Science

College of Public Health and Health Professions

#### A. Mission

The mission of the Rehabilitation Science Ph.D. (RSD) Program at the University of Florida is to educate future investigators in the area of rehabilitation science. The RSD program faculty are charged with training rehabilitation scientists who will be capable of engaging in translational research and sustaining independently funded research programs.

The mission of RSD program is consistent with the mission of the College of Public Health and Health Professions: *to preserve, promote, and improve the health and well-being of populations, communities, and individuals and fulfilled by collaborations fostered among public health and the health professions in education, research, and service.* The RSD mission is also consistent with the threefold mission of the University of Florida: *teaching, research and service.* These overall goals are championed by the RSD Program through rigorous coursework, innovative research and ongoing service to the community.

SLO Type	Student Learning Outcome	Assessment Method	Degree Delivery
Knowledge #1	Apply competencies in models and theory of Rehabilitation Science	<ol> <li>Performance on PhD Rehabilitation Science Theory Question on Qualifying Exam.</li> <li>Understanding will be reflected in the final dissertation defense.</li> </ol>	Campus
Skills #2	Develop competencies for conducting rehabilitation research.	<ol> <li>Performance on the PhD Qualifying Examination.</li> <li>Understanding will be demonstrated via successful completion of the final dissertation defense.</li> </ol>	Campus
Skills #3	Develop competencies for teaching at the undergraduate level, and in entry level professional graduate programs.	<ol> <li>Feedback on teaching competency from faculty</li> <li>Performance in supervised teaching experience.</li> </ol>	Campus
Knowledge #4	Apply competencies in a focused area of rehabilitation science that can be applied in a research study.	<ol> <li>Performance on research concentration area question on PhD Qualifying Examination.</li> <li>Peer review of successfully published research paper.</li> </ol>	Campus
Professional Behavior #5	Exhibit ethical research conduct.	1. Observation of performance in research activities.	Campus
Knowledge #6	Display understanding of role of academic researcher.	<ol> <li>Successful completion of doctoral dissertation</li> <li>Acceptance of peer-reviewed research manuscript</li> </ol>	Campus

#### **B. Student Learning Outcomes and Assessment Measures**

#### **C. Research**

All doctoral candidates in the RSD Program are required to prepare and present a dissertation that shows independent investigation and that is acceptable in form and content to the supervisory committee and to the Graduate School. An oral defense must be satisfactorily completed before the student's supervisory committee. Reporting research findings in peer-reviewed journals is an essential component of the scientific process and a fundamental part of the graduate experience. Accordingly, publishing research findings is a high priority for all RSD students.

Each student completes coursework pertaining to Research Methods and Statistics and Rehabilitation Science Application & Teaching followed by specialty coursework in one of two concentration areas: Movement Science or Disability Science.

All RSD students must enroll in a total of at least 32 semester hours of research application. The courses listed reflect progressive involvement in actual research working with the major professor: *RSD* 6905 – *Independent Work RSD* 6910 – *Supervised Research*8 RSD 7979 – Advanced Rehabilitation Research RSD 7980 - Doctoral Dissertation

#### **D.** Assessment Timeline

#### Program Ph.D. in Rehabilitation Science

#### **College of Public Health and Health Professions**

Assessment SLOs	Assessment 1	Assessment 2	Assessment 3	Assessment 4	Assessment 5
Content Knowledge	Performance on Rehabilitation Science Theory Question on Qualifying Exam	Understanding will be reflected in the final dissertation defense	Performance on research concentration area question on Qualifying Exam.	Peer review of successfully published research paper.	Successful completion of doctoral dissertation
#1 Apply in models and theory of Rehabilitation Science	X When PhD qualifying examination is passed	X When dissertation successfully is defended			
#4 Apply competencies in a focused area of rehabilitation science that can be applied in a research study.			X When PhD qualifying examination is passed	X When paper(s) is accepted for publication	
# <b>6</b> Exhibit an understanding of role of academic researcher.					X When dissertation successfully is defended
Assessment SLOs	Assessment 1	Assessment 2	Assessment 3	Assessment 4	Assessment 5
Skills	Performance on the PhD Qualifying Examination.	Understanding will be demonstrated via successful completion of the final dissertation defense.	Feedback on teaching competency from faculty.	Performance in supervised teaching experience	
#2 Develop competencies for conducting rehabilitation research	X When PhD qualifying examination is passed	X When dissertation successfully is defended			
#3 Develop competencies for teaching at the undergraduate level, and in entry level professional			X During Supervised teaching experience through dissertation defense	X During Supervised teaching experience through dissertation defense	

graduate programs.					
Assessment SLOs	Assessment 1	Assessment 2	Assessment 3	Assessment 4	Assessment 5
Professional Behavior	Observation of performance in research activities.				
<b>#5</b> Exhibit an understanding of role of academic researcher.	X All Years of Individual's PhD program				

#### E. Assessment Cycle

Assessment Cycle for:

<u>Program Ph.D. in Rehabilitation Science</u> Analysis and Interpretation: Program Modifications: Dissemination:

#### Program Ph.D. in Rehabilitation Science College of Public Health and Health Professions

<u>\_\_\_\_\_RSD Student Activity Report (SAR) Summer</u> Completed by <u>\_\_\_\_\_Summer B</u> Completed by <u>\_\_\_\_\_Fall Semester</u>

Year SLOs	10-11	11-12	12-13	13-14	14-15	15-16
#1 Apply competencies in models and theory of Rehabilitation Science				Х	Х	Х
#2 Develop competencies for conducting rehabilitation research				Х	Х	Х
#3 Develop competencies for teaching at the undergraduate level, and in entry level professional graduate programs				Х	Х	Х
#4 Apply competencies in a focused area of rehabilitation science that can be applied in a research study.				Х	Х	Х
#5 Exhibit an understanding of role of academic researcher.				Х	Х	Х
#6 Exhibit an understanding of role of academic researcher.				Х	Х	х

Assessments were not collected in years 2010-2013 as the RSD program was moved to the Department of Physical Therapy.

#### F. Measurement Tools

<u>Direct Measurement Tool</u>: Written qualifying examination; dissertation defense; course examinations; and course projects; feedback from teaching performance.

<u>Indirect Measurement Tools</u>: Number of peer-reviewed research publications of publications, retention rate, time to graduation.

#### **Figure 1: Rubric for Written Qualifying Examination**

Criteria	Needs Improve ment	Satisfactory
1. Demonstrates understanding of the application of his or her work to rehabilitation science.		
2. Demonstrates mastery of specialized course work.		
3. Demonstrates capability for independent research in the area of study, preparedness in core disciplines relevant to rehabilitation science research, and ability to complete research in the proposed area trough to dissertation defense.		

#### Rubric for use in the Written Qualifying Examination

Passing is by approval of the graduate student's supervisory committee and requires all three criteria are met satisfactorily.

If any portion of the exam is deemed unsatisfactory; the student will be given written guidelines regarding how to improve that particular exam section.

Rubric approved by the RSD Steering Committee on February 28, 2013.
