

## Remove References to “Math Requirement”

Rationale – The creation of the state general education core curriculum and recent changes in the UF general education program (including converting MR and M/MR courses into M courses) have eliminated the need for a “Math Requirement” that is separate from the general education requirement.

Proposal – Remove references to the “Math Requirement” in the general education website and the 2014-2015 undergraduate catalog, as follows:

1. In sections describing the general education requirements in the general education website (<http://gened.aa.ufl.edu/gen-ed-requirements.aspx>) and the undergraduate catalog (<https://catalog.ufl.edu/ugrad/current/advising/info/general-education-requirement.aspx>), change “Three credit hours must be an approved pure mathematics course” to “Three credit hours must be obtained from a general education mathematics course with a prefix of MAC, MAP, MAS, MGF, or MHF”.
2. Delete the Math Requirement page from the general education website (<http://gened.aa.ufl.edu/math-requirement.aspx>).
