Description of request	This request is to add a 1 credit DCP course to the interior design curriculum to gain a broader understanding of the allied design fields and promote collaboration and interdisciplinary work. Since we have added 1 credit, we are also modifying the General Education Math from 3 credits to 2, this still meets the 6 total credits needed.

Current Curriculum for MajorSee attached document with tracked changes

Proposed Curriculum Changes See attached document with track changes. The change is to add a college wide design course to our curriculum. We will be adding it in fall of the 1st semester, and to keep our number of graduation credits the same we are modifying our general education math credit from 3 to 2, which still gives us the 6 needed.

Pedagogical Rationale/JustificationTo strengthen the understanding of allied design fields since they will be working with these disciplines in the profession.

Impact on Enrollment, Retention, GraduationNo change anticipated.

Critical Tracking Model Semester Plan

Overview

Interior design is both an art and a science that involves the creation of imaginative and well-conceived spaces that:

- Serve the needs, function and requirements of individuals
- Provide a sense of place within both public and private spaces for group and individual activity
- Are appropriate and sustainable
- Include the community, owners, users, designers, planners and contractors as active participants in the design process.

Through the learning design process, graduates develop on all levels: as a thoughtful leader, an innovator, a collaborator and as an ethical and socially engaged human being. This program prepares students for professional careers in office design, retail, healthcare, residential and hospitality design.

Examples of interior design specializations include historic preservation and environmental sustainability.

To give students first-hand design exposure, the department organizes trips to interact with designers in experienced firms, installations, significant buildings and exhibitions in cities such as Atlanta and Chicago.

During the summer, upper-division students have opportunities to enroll in the international programs including the Detmold School for Architecture and Interior Architecture at the University of the Applied Sciences in Detmold, Germany. The department offers academic credit to explore professional

opportunities through the required Design Field Experience (DFE) program. Interior design students may consider pursuing graduate studies in the program's 4+1 option to receive a Master of Interior Design.

Organized trips to experience interior design, architecture and art in urban settings are required in the junior and senior years. Students should plan to have adequate funds for these required field trips and for their design studio project materials.

The four-year program is accredited by the Council for Interior Design Accreditation (CIDA).
