RE: Department Name Change Request in the College of Veterinary Medicine

Dear Dr. Kwolek Folland,

Please accept this letter as clarification of the rationale for the requested name change of the Department of Infectious Diseases and Pathology (ID&P) in the College of Veterinary Medicine (CVM).

This request is a follow up to a recently-approved administrative reorganization that led to the creation of a new academic Department of Comparative, Diagnostic and Population Medicine (CDPM) within the CVM. As part of the process to develop a mission and approve the new department, 19 current faculty members in other CVM academic departments voted to join and become inaugural members of CDPM, including all anatomical pathology faculty members who were formerly in ID&P. As a consequence of this realignment, pathology is no longer part of ID&P and, therefore, the remaining ID&P faculty have proposed a change of department name to better reflect the revised mission and focus of their department. The unanimous choice of the ID&P faculty was to change the department name to the Department of Infectious Diseases and Immunology. This proposed change has been endorsed unanimously by the ID&P faculty, the CVM Faculty Council and approved by the CVM faculty as outlined in supporting documents submitted previously. Aside from the change in name, there will be no revision in the research nor educational responsibilities, which includes teaching of professional veterinary and graduate students. In light of this, there should be no discernable impact on or disadvantage to any students enrolled in the professional or graduate programs. Likewise, since the name change has been endorsed by all faculty members in ID&P, I have no concern about any potential for disadvantage of any faculty members in ID&P.

In closing, please contact me if you need additional information. Otherwise, I appreciate your attention to this matter and look forward to a successful outcome.

Sincerely,

Thomas W. Vickroy, Ph.D.  
Professor & Executive Associate Dean

Campus

Re: Department name change

Dear Dean Lloyd:

You charged us with the task of changing the name of our department in a meeting of our faculty on Monday, January 23, 2017, and the discussion that followed was facilitated by Ms. Tricia Bachus from the UF Office of Training and Organizational Development.

The list of new names previously suggested by faculty for our department was reviewed, and the faculty expressed that those names had been thoroughly discussed in various venues. Thus, the faculty came rapidly to the consensus decision to formally change the name of our department from the *Department of Infectious Diseases and Pathology* to the *Department of Infectious Diseases and Immunology*.

Please move forward with the administrative steps needed to make this name change official. If any additional information is needed, please let me know.

Sincerely,

John B. Dame, PhD  
Professor and Chair  
Department of Infectious Diseases and Pathology
