Semiconductor Certificate

Info

Process	Certificate New Ugrad/Pro
Status	Pending
Submitter	Nunez,Julissa jnunez@ufl.edu
Created	12/3/2014 2:29:45 PM
Updated	2/3/2015 10:56:36 AM
Description	The Semiconductor Certificate is awarded by the Department of Materials and Science and Engineering (MSE) to acknowledge a concentration in the area of semiconductor materials. This Certificate provides students a foundation in the fundamental physics, processing, and technological applications of various semiconductor materials.

This form may be used to propose a new certificate. Instructions for completing and submitting this form are on the last page.

Proposed Certificate

1. Certificate Name Semiconductor Materials
2. Transcript Title (maximum 50 characters) Semiconductors Materials
3. Amount of Credit 10
4. Level ☒ Baccalaureate ☐ Graduate ☐ Professional
5. CIP Code 14.1801 6. Degree Name BS in Materials Science and Engineering
7. Effective Term Fall/2015

8. Certificate Description (50 words or less)

The Semiconductor Certificate is awarded by the Department of Materials and Science and Engineering (MSE) to acknowledge a concentration in the area of semiconductor materials. This Certificate provides students a foundation in the fundamental physics, processing, and technological applications of various semiconductor materials.

9. Requirements

EEL3008 – Physics of Electrical Engineering, EMA4614 – Processing of Electronic Materials, EMA4615 – Compound Semiconductor Materials, and EMA3414L – Electronic Materials Laboratory

10. Prerequisites

CHM2045 – General Chemistry 1 or CHM2095 – Chemistry for Engineers 1, EMA3010 – Materials, EMA3413 – Electronic Properties of Materials, and EEL3003 – Elements of Electrical Engineering or EEL3111C – Circuits 1

11. Rationale and Place in Curriculum

This will be a certificate available to undergraduate students both within and outside of the Materials Science and Engineering bachelor's degree program. Certificates will provide students the opportunity to specialize in one materials area they are particularly interested in and obtain a beneficial addition to their transcripts and/or CV.

12. Student Learning Outcomes

1. Ability to apply knowledge of mathematics, science, and engineering to materials systems.
- EMA4614, EMA4615, & EMA3414L
- Homework and Exam problems – Assessed by a single faculty member
2. Ability to conduct experiments, analyze and interpret data.
- EMA3414L
- Lab evaluation – Assessed by a single faculty member
3. Ability to conduct and analyze design of experiments.
- EMA3414L
- Lab assignments – Assessed by a single faculty member
4. Ability to apply and integrate knowledge of structure, properties, processing, and performance to solve materials selection and design problems within realistic constraints.
- EMA3414L
- Lab assignments – Assessed by a single faculty member
6. Ability to identify, formulate, and solve engineering problems.
- EMA3414L
- Lab assignments – Assessed by a single faculty member
7. Understanding of professional and ethical responsibility.

-EMA3414L

- Lab assignments – Assessed by a single faculty member

8. Ability to communicate effectively in both oral and written form.

-EMA3414L

- Lab assignments – Assessed by a single faculty member

13. Ability to use the techniques, skills, and tools needed for practice as a materials engineer.

- EMA3414L

- Lab assignments – Assessed by a single faculty member

- Prepare a document showing the catalog-style description of the certificate, requirements for entry, requirements for completion, and a suggested semester-by-semester plan using a Word document.
- Prepare supporting documentation including memos, emails, etc. from other units to provide evidence of the availability of courses that are required for the certificate and/or to provide evidence for support of the proposed certificate if there is clear or potential overlap or duplication of content.

Instructions

This form may be used to propose a new undergraduate certificate.

1. Enter the name of the certificate. Example: Urban Pest Management.
2. Enter the transcript title of the certificate. This is limited to 50 characters, including spaces.
3. Enter the total number of credit hours needed to complete the certificate program.
4. Enter the program level of the certificate.
5. Enter the six digit Classification of Instructional Programs (CIP) code for the degree program associated with the proposed certificate. The code has the numerical format XX.XXXX. Contact the [Office of Institutional Planning and Research](#) (OIPR) to verify the CIP code for the existing degree program.
6. Enter the degree name associated with the CIP code entered above.
7. Enter the term (semester and year) that the certificate would start.
8. Enter a description of the certificate. This is limited to 50 words or less.
9. List the requirements of the certificate program, such as courses, internships, etc.
10. List any prerequisite requirements for this new certificate program such as courses, internships, volunteer hours, credit hours, or grade point average.
11. Describe the rationale for offering this new certificate and having it on the transcript, its place in the curriculum, how it will enhance the quality of the existing program or department. Also describe its overlap with any existing certificates and programs, and a justification for any such overlap.
12. List each student learning outcome with its associated courses, assessment type (e.g. course-related exam/assignment/grade, final paper/project/presentation, standardized exam, capstone) and method (e.g. rubric, faculty committee, single faculty member).

Semiconductor Materials Certificate

Credits: 10, with minimum grades of C

The Semiconductor Certificate is awarded by the Department of Materials and Science and Engineering (MSE) to acknowledge a concentration in the area of semiconductor materials. This Certificate provides students a foundation in the fundamental physics, processing, and technological applications of various semiconductor materials.

Prerequisite Courses

- CHM 2045 General Chemistry 1, or
CHM 2095 Chemistry for Engineers 1, both 3 credits
- EMA 3010 Materials, 3 credits
- EMA 3413 Electronic Properties of Materials, 3 credits
- EEL 3003 Elements of Electrical Engineering, 3 credits, or
EEL 3111C Circuits 1, 4 credits

Required Courses

- EEL 3008 Physics of Electrical Engineering, 3 credits
- EMA 4614 Processing of Electronic Materials, 3 credits
- EMA 4615 Compound Semiconductor Materials, 3 credits
- EMA 3414L Electronic Materials Laboratory, 1 credit

Recommended Semester Plan

To remain on track, students must complete the appropriate critical-tracking courses, which appear in bold. Students are required to complete HUM 2305

The Good Life (GE-H) in semester 1 or 2.

Semester 1

If you don't place out of ENC1101, take it in the fall

CHM2045 General Chemistry 1 (GE-P) or CHM2095 Chemistry for Engineers 1 (GE-P)	3
CHM2045L General Chemistry 1 Laboratory (GE-P)	1
MAC2311 Analytic Geometry and Calculus 1 (GE-M)	4
Humanities (GE-H)	3
Social and Behavioral Sciences (GE-S)	3
14 Total	

Semester 2

CHM2046 General Chemistry 2 (GE-P) or CHM2096 Chemistry for Engineers 2 (GE-P)	3
CHM2046L General Chemistry 2 Laboratory (GE-P)	1
MAC2312 Analytic Geometry and Calculus 2 (GE-M)	4
ENC3246 Professional Communication for Engineers (GE-C)	3
HUM2305 What is the Good Life (GE-H)	3
14 Total	

Semester 3	Credits
MAC2313 Analytics Geometry and Calculus 3 (GE-M)	4
PHY2048 Physics with Calculus 1 (GE-P)	3
PHY2048L Physics with Calculus 1 Laboratory (GE-P)	1
EIN4354 Engineering Economy (3) or MAN3025 Principles of Management (4) or	
MAR3023 Principles of Marketing (4)	3 or 4
EMA3010 Materials	3
Computer programming course (COP2271 or see advisor for approved list)	2
	16 or 17 Total
Semester 4	Credits
EGM2511 Engineering Mechanics – Statics	3
EMA3011 Fundamental Principles of Materials	3
EMA3800 Error Analyses and Optimization Methodologies in Materials Research	3
EMA3XXXL Sophomore Materials Lab	1
MAP 2302 Elementary Differential Equations	3
PHY2049 Physics with Calculus 2	3
PHY2049L Physics with Calculus 2 Laboratory	1
	17 Total
Semester 5	Credits
EEL3003 Elements of Electrical Engineering	3
Humanities (GE-H) or Social and Behavioral Sciences (GE-S)	3
Social and Behavioral Sciences (GE-S)	3
	9 Total
Semester 6	Credits
EGM3520 Mechanics of Materials	3
EMA3050 Introduction of Inorganic Materials	3
EMA3066 Introduction to Organic Materials	3
EMA3080C Materials Laboratory 1	2
EMA4314 Energetics and Kinetics in Materials Science	3
	14 Total
Semester 7	Credits
EMA3013C Materials Laboratory 2	2
EMA4313 Introduction to Electronic Materials	3
EMA3513C Analysis of the Structure of Materials	4
EMA4125 Transport Phenomena in Materials Processing	3
EMA4223 Mechanical Behavior of Materials	3
	15 Total
Semester 8	Credits
EMA4324 Stability of Materials	3
EMA4913 Research in Materials Science and Engineering 1 or	
EMA4915 Integ Prod/Proc Des 1	1 or 3
Technical Elective	3
EMA4614 Processing of Electronic Materials	3
EEL 3008 Physics of Electrical Engineering	3
EMA Senior Materials Lab Elective	1
	14 or 16 Total
Semester 9	Credits
EMA4121 Interfacial Engineering	3
EMA4714 Materials Selection and Failure Analysis	3
EMA4914 Research in Materials Science and Engineering 2 or	
EMA4916 Integ Prod/Proc Des 2	3
EMA4615 Compound Semiconductor Materials	3
	12 Total
