22. Item from the floor

Accounting asked to revisit their request for a change to their degree program that was tabled at the December meeting. Dr McGill will meet with Dr Mair to discuss changes that need to be made relative to the inclusion of graduate courses in the undergraduate degree program. In the meantime, the school asked for consideration of their requested changes to substitute the courses that were newly approved at the December meeting for other courses in the degree program that are being eliminated. This change also supports the schools move away from modular courses at the undergraduate level. These requested changes were approved.

The meeting was adjourned at 2:47 p.m.
