RationaleWe are requesting a change in course title to remove confusion among our students. Some students perceive that "Enhanced" means that this is an honors course or somehow more challenging than a traditional chemistry course. The enhancement is simply that this course is specifically designed for Chemistry majors. Therefore, we feel a more appropriate name is Organic Chemistry 2 for Majors.

We are also requesting to remove the phrase "or preprofessional students" from the prerequisites. This course is not open to students in majors other than Chemistry, and the current phrasing implies that other majors are eligible.
