**Description of request**: Provides students with both theoretical and practical knowledge and essential technical skills for the conceptualization and digital visualization of video game assets. Covers the principles and practical applications of industry-standard software suites. Emphasis is on developing strong foundational skills, compelling conceptual ideas, and self-motivated problem solving.

Maximum Repeatable Credits 3
Change Course Description? Yes
Current Course Description Fundamentals and core practices of traditional game design, including theories, organizing frameworks and technical processes. Build technical skills in conceptualization,
visualization, prototyping and user-testing of digital games. Fluencies acquired will also apply to other
design-centric constructs in the digital arts and sciences.

**Proposed Course Description (50 words max)** Provides students with both theoretical and practical
knowledge and essential technical skills for the conceptualization and digital visualization of video
game assets. Covers the principles and practical applications of industry-standard software suites.
Emphasis is on developing strong foundational skills, compelling conceptual ideas, and self-motivated
problem solving.

**Change Prerequisites? No**

**Change Co-requisites? No**

**Rationale** In recent years, the development of game art-assets and visuals has become a high-
demand skill in the video game industry. To stay current with this change, the Digital Worlds Institute is
updating aspects of our video game related courses. Based on significant feedback from industry
partners and advisors, our current course entitled “Game Design Practices” would be updated in its
content. The course was originally envisioned as part of a series on game design; however, changes
in industry terminology over the past several years have made it necessary to update several of our
courses to specify the skills and techniques students will develop in each course. The newly updated
description more accurately describes skills and techniques in the course such as digital illustration,
conceptualization, and game assets design.
GAME DESIGN PRACTICES

COURSE DESCRIPTION
Provides students with both theoretical and practical knowledge and essential technical skills for the conceptualization and digital visualization of video game assets. Covers the principles and practical applications of industry-standard software suites. Students work within multiple game-related specialties to build up a general understanding of the pipeline and processes involved. Emphasis on developing strong foundational skills, compelling conceptual ideas, and self-motivated problem solving. Simulates the working conditions in professional video game asset production throughout the semester through assignments and hands-on projects.

Online recordings: TBA
Password: TBA

PREREQUISITE KNOWLEDGE AND SKILLS
BA in DAS or Written Consent of Instructor

PURPOSE OF COURSE
An introduction to contemporary industry practices in creating design-related assets for video game production.

COURSE GOALS AND/OR OBJECTIVES:
At the end of the course, students will be able to:

• Render conceptual designs per assigned brief.
• Render basic environment assets.
• Use different perspectives to analyze and investigate events and production cycles in the video game production process.
• Effectively implement core principles of the game asset production process: brief analysis, rough sketches, conceptual designs, and final assets.
• Critically analyze the construction of digital and non-digital games from the game design perspective.
COURSE SCHEDULE:

THERE IS NO FINAL EXAM IN THIS CLASS. INSTEAD, THERE WILL BE A FINAL PROJECT IN LIEU OF THE FINAL EXAM. THE FINAL PROJECT IS DUE ON THE DATE/TIME OF A SCHEDULED FINAL EXAM.

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
<th>Assignments</th>
</tr>
</thead>
</table>
| 1    | Course introduction; Game scene backgrounds (atmosphere, environments, non-interactable); short game design elaboration; design of the following elements:  
- Sky  
- Clouds and atmospheric effects  
- Natural landscape elements (mountains, plains, bodies of water, forests, sand dunes)  
- Urban landscape elements (cityscapes)  
Practical work/Project Review | Assignment 1:  
Short game design elaboration; designing three thematically distinct sets of scene background elements, with a unified visual style. |
| 2    | Game scene mid-grounds (game world, interactable); design of the following elements:  
- Natural landscape elements (rocks, trees, corals, cliffs)  
- Urban landscape elements (buildings, rooftops, concrete and metal constructions, metal bars, gates)  
Practical work/Project Review | Assignment 2  
Designing mid-ground elements to complement each of the three previously designed background elements. |
| 3    | Game scene foregrounds (non-interactable); designing the following elements close-up:  
- Natural landscape elements (vegetation, rocks, ground mass, mass of water)  
- Urban landscape elements and mise-en-scene (pillars, non-interactive props)  
Practical work/Project Review | Assignment 3  
Designing foreground elements to complement each of the three previously designed scene elements. |
| 4    | Platformer game tiles and building elements:  
- Designing modular elements that can be tiled in order to create scenery  
- Designing ground tiles, slope tiles, water tiles  
- Various tile types for greater modularity  
Practical work/Project Review | Assignment 4  
Designing three sets of tile elements for each of the previously designed scene elements. |
| 5    | Player character  
- Concept proposal for player character (PC)  
- Elaboration and final design of player character  
Practical work/Project Review | Assignment 5  
Rough concept design of Player character; design, refinement and final Design of a selected character concept. |
<p>| 6    | Non player characters | Assignment 6 |</p>
<table>
<thead>
<tr>
<th>Chapter</th>
<th>Description</th>
</tr>
</thead>
</table>
| 7       | Props, in game collectable items, vehicles; design of the following elements:  
- Collectable items (health, ammo, upgrades)  
- Vehicles  
- Props (weapons, communication devices, protective gear, tools)  
Practical work/Project Review |
| 8       | Characters - layer separation for animation  
- Understanding the principles of 2D animation using separate layers  
- Analysis of animation possibilities for PC  
- Separation of a character into layers to be used for in-game character animation  
Practical work/Project Review |
| 9       | Player character animation sprite sheet  
- Understanding of sprite sheet format and it's application in game animation  
- Basic principles of creating an animation sprite sheet for the player character  
Practical work/Project Review |
| 10      | Player character power up variations  
- Designing visual variations of the player character to illustrate various states of the character (various power-up levels, various fatigue levels)  
- Designing clear visual feedback of gameplay  
Practical work/Project Review |
| 11      | UI elements; design of the following UI elements:  
- buttons  
- heads-up display (HUD)  
- checkboxes  
- slider bars  
Practical work/Project Review |
| 12      | Particle materials; understanding 2D particle effects, and |

Concept design of NPC in a unified visual style to complement the design of the PC; design, refinement and final Design of a selected NPC concept.

Assignment 7  
Designing a set of collectable items, vehicles and props according to the game world logic and specific needs of the project.

Assignment 8  
Separation of various animation layers to be used for in game animation of PC. Preparation of PC Design for in game animation.

Assignment 9  
Creating three sprite sheets for three chosen in-game player character actions (ducking, walking, jumping, greeting).

Assignment 10  
Designing three different player character design states in line with the existing player character design, in line with specific project needs.

Assignment 11  
Designing specific UI elements (buttons, HUD, checkbox, slider bar) in line with the overall visual and narrative style of the game.
<table>
<thead>
<tr>
<th></th>
<th>Creating graphics for specific particle systems:</th>
<th>Designing 10 graphics to be used as materials for 2D particle effects, in line with the overall visual style of the game, according to the needs of the project.</th>
</tr>
</thead>
</table>
|   | • Natural particle elements (rain, smoke, fire, snow, dust)  
|   | • Magical particle elements  
|   | Practical work/Project Review |   |
| 13 | Menu screens; concept elaboration and design of various special screens: | Assignment 13  
|   | • Company splash screen  
|   | • Game welcome screen  
|   | • Play with sound screen  
|   | • Credits screen  
|   | • Special screens  
|   | Practical work/Project Review | Designing five different special screens, according to the needs of the project, in line with the overall visual style of the game. |
| 14 | Icons; the purpose, variations and design of application icons.  
|   | Practical work/Project Review | Assignment 14  
|   | Designing 10 various graphics to be used as application icons for the game project. |
| 15 | Art book: collection of artwork, together with explanations, development stages and GDD: | Final Project  
|   | • Elaboration and purpose of video game project visual style guide  
|   | • Art book as a form of project portfolio  
|   | Practical work/Project Review | Designing a PDF file to display all of the previously finished specific assignments, their development stages as well as brief game design overview. |

**REQUIRED TEXTBOOKS, HARDWARE AND SOFTWARE:**

1. Adobe Photoshop  
2. Digital drawing/graphics tablet
RECOMMENDED MATERIALS:

4. K. Daiger (2009) *The Documents and Assets Created During the Video Game Production Process, University of Texas, School of Information (PDF)*
8. S. Guenzel (2014) *Push Start: The Art of Video Games, Earbooks*

COURSE FEES:

Course fees are assessed for certain courses to offset the cost of materials or supply items consumed in the course of instruction. A list of approved courses and fees is published in the Schedule of Courses each semester. (UF-3.0374 Regulations of the University of Florida).

Material and supply and equipment use fee information is available from the academic departments or from the schedule of courses (Florida Statutes 1009.24). The total course fee for this class $54.26

The total course fee for each course is listed on the UF Schedule of Courses. ([https://registrar.ufl.edu/soc/](https://registrar.ufl.edu/soc/)).

More information on grades and grading policies is here: [https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx](https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx)
COURSE POLICIES:

PARTICIPATION / ATTENDANCE
We value participation more than mere attendance. Each Instructor is responsible for communicating the specific details of what percentage of your grade (if any) will be assigned to participation, and how class participation will be measured and graded. Real Time [RT] interaction with your peers and the Instructor will empower you to greater achievement.

MAKE-UP POLICY
All projects must be submitted on time. Students shall be permitted a reasonable amount of time to make up the material or activities covered in their absence as outlined under UF attendance policy: https://catalog.ufl.edu/ugrad/1617/regulations/info/attendance.aspx

Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at: https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx

COURSE TECHNOLOGY
The students will be required to have access to, and use a personal computer with the access to the Internet. Word editing software will be required for written assignments.

COURSE COMMUNICATIONS
Students can communicate directly with the Instructor regarding the course material through the course management system (CANVAS).

VIDEO LECTURE CAPTURE
High-quality video lecture capture of this course is available only for enrolled students. These video captures are edited and posted within 24-48 hours of the class meeting for the benefit of the Your Own Time [YOT] students and to offer the potential for review by on-campus and Real Time [RT] online students. For the on-campus and RT students, watching lectures in lieu of attending and participating in class is NOT acceptable.

Your Instructor will provide you with this semester’s login information during the first week of class. It is not permissible to share or distribute video login information to anyone other than officially enrolled students of this course. Lecture videos can be found at https://vimeo.com/digitalworlds.
UF POLICIES:

UNIVERSITY HONESTY POLICY
UF students are bound by The Honor Pledge that states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

CLASS DEMEANOR
Students are expected to arrive to class on time and behave in a manner that is respectful to the instructor and to fellow students. Please avoid the use of cell phones and restrict eating to outside of the classroom. Opinions held by other students should be respected in discussion, and conversations that do not contribute to the discussion should be held at minimum, if at all.

STUDENTS REQUIRING ACCOMMODATIONS
Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

NETIQUETTE COMMUNICATION COURTESY
All members of the class are expected to follow rules of common courtesy in all email messages, threaded discussions and chats, more information can be found at: http://teach.ufl.edu/wp-content/uploads/2012/08/NetiquetteGuideforOnlineCourses.pdf

ONLINE COURSE EVALUATIONS
Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at evaluation results.
