Process	Course New Ugrad/Pro
Status	Pending at PV - University Curriculum Committee (UCC)
Submitter	Thomas Bianchi tbianchi@ufl.edu
Created	2/23/2017 9:45:47 AM
Updated	2/23/2018 12:58:25 PM
Description of request	<p>Humans have had a long relationship with the ebb and flow of tides on river deltas around the world. However, this relationship has at times been both nurturing and tumultuous for the development of early civilizations. But something else has been altered in the natural rhythm of these cycles. The massive expansion of human populations around the world in both the lower and upper drainage basins of these large rivers have changed the manner in which sediments and water are delivered to deltas. The fate of river deltas around the world is now less stable and more unpredictable. Because of the high density of human populations found in these regions, humans have developed elaborate hydrological engineering schemes in an attempt to “tame” these deltas. While some ventures have worked in the short-term, others have failed miserably. Moreover, with the current eustatic sea-level rise (SLR), coupled with delta subsidence (sinking of land) - due to natural and human-linked reasons, the fate of modern deltas is in even greater jeopardy. Consequently, the future of numerous modern megacities built on deltas is now also in question. The goal of this course is to provide information on the historical relationship between humans and deltas that will hopefully encourage immediate preparation for coastal management plans in response to the impending inundation of major cities, as a result of global change around the world.</p> <p>This course would be an excellent elective for the Marine Science majors at UF. There is no class of this type on campus and is very timely as it relates the human impact on some of the major deltas of world from a socioeconomic and environmental perspective.</p>

Category of Instruction Intermediate

Lab Code None

Course Title DELTAS and HUMANS

Transcript Title Deltas and Humans

Degree Type Baccalaureate

Delivery Method(s) On-Campus

Co-Listing No

Effective Term Spring

Effective Year 2018

Rotating Topic? No

Repeatable Credit? No

Amount of Credit 3

S/U Only? No

Contact Type Regularly Scheduled

Weekly Contact Hours 3

Course Description Examines the historical relationship between humans and deltas, outlining possible coastal management plans in response to sea level rise

Prerequisites junior status

Co-requisites none

Rationale and Placement in Curriculum This course would be an excellent elective for the Marine Science majors at UF. There is no class of this type on campus and is very timely as it relates the

human impact on some of the major deltas of world from a socioeconomic and environmental perspective.

Course Objectives Students who successfully complete the course will be able to understand: 1) the basics of the processes controlling the fate of deltas; 2) linkages of early human civilization systems with deltas and climate change is impacting the major global rivers and deltas; and 3) how deltaic systems form and how they can be managed in the future.

Course Textbook(s) and/or Other Assigned Reading Deltas and Humans, By Thomas S. Bianchi, Oxford Univ. Press

Weekly Schedule of Topics Week 1 - Early Human Civilizations and River Deltas

Week 2 - "

Week 3 - The Ever- Changing Delta

Week 4 - "

Week 5 - The Holocene and Global Climate Change

Week 6 - "

Week 7 - Mid-Term

Week 8 - Changes in the Hinterland and Floodplain

Week 9 - "

Spring Break

Week 10 - Effects of Sea- Level Rise and Subsidence on Deltas

Week 11 - "

Week 12 - Saving the Deltas: The Human– Delta Relationship

Week 13 - "

Week 14 - Exploring a Sustainable Future

Week 15 - "

Links and Policies Attendance and Absence

Students are responsible for satisfying all academic objectives as defined by the instructor. Absences count from the first class meeting.

In general, acceptable reasons for absence from or failure to participate in class include illness, serious family emergencies, special curricular requirements (e.g., judging trips, field trips, professional conferences), military obligation, severe weather conditions, religious holidays, and participation in official university activities such as music performances, athletic competition or debate. Absences from class for court-imposed legal obligations (e.g., jury duty or subpoena) must be excused. Other reasons also may be approved.

Students shall be permitted a reasonable amount of time to make up the material or activities covered in their absence.

Students cannot participate in classes unless they are registered officially or approved to audit with evidence of having paid audit fees. The Office of the University Registrar provides official class rolls to instructors.

If a student does not participate in at least one of the first two class meetings of a course or laboratory in which they are registered, and he or she has not contacted the department to indicate his or her intent, the student can be dropped from the course. Students must not assume that they will be dropped, however. The department will notify students if they have been dropped from a course or laboratory.

The university recognizes the right of the individual professor to make attendance mandatory. After due warning, professors can prohibit further attendance and subsequently assign a failing grade for excessive absences.

Religious Holidays

At the University of Florida, students and faculty work together to allow students the opportunity to observe the holy days of his or her faith. A student should inform the faculty member of the religious observances of his or her faith that will conflict with class attendance, with tests or examinations, or with other class activities prior to the class or occurrence of that test or activity. The faculty member is then obligated to accommodate that particular student's religious observances. Because students

represent a myriad of cultures and many faiths, the University of Florida is not able to assure that scheduled academic activities do not conflict with the holy days of all religious groups. Accordingly, individual students should make their need for an excused absence known in advance of the scheduled activities.

The Florida Board of Education and state law govern university policy regarding observance of religious holidays.

The following guidelines apply:

Students, upon prior notification to their instructors, shall be excused from class or other scheduled academic activity to observe a religious holy day of their faith.

Students shall be permitted a reasonable amount of time to make up the material or activities covered in their absence.

Students shall not be penalized due to absence from class or other scheduled academic activity because of religious observances.

If a faculty member is informed of or is aware that a significant number of students are likely to be absent from class because of a religious observance, the faculty member should not schedule a major exam or other academic event at that time.

A student who is to be excused from class for a religious observance is not required to provide a second party certification of the reason for the absence. Furthermore, a student who believes that he or she has been unreasonably denied an education benefit due to religious beliefs or practices may seek redress through the student grievance procedure.

Illness Policy

If a student is absent from classes or examinations because of illness, she or he should contact their instructors. Students should contact their college by the deadline to drop a course for medical reasons. Students can petition the Dean of Students Office to drop a course for medical reasons. The university's policy regarding medical excuse from classes is maintained by the Student Health Care Center.

Students shall be permitted a reasonable amount of time to make up the material or activities covered in their absence.

Twelve-Day Rule

Students who participate in athletic or extracurricular activities are permitted to be absent 12 scholastic days per semester without penalty. (A scholastic day is any day on which regular class work is scheduled.) Instructors must be flexible when scheduling exams or other class assignments.

The 12-day rule applies to individual students participating on athletic or scholastic teams. Consequently, a group's schedule that requires absence of more than 12 days should be adjusted so that no student is absent from campus more than 12 scholastic days.

If a student previously has been warned about absences or unsatisfactory work, he or she should not incur additional absences, even if he or she has not been absent 12 scholastic days. It is the student's responsibility to maintain satisfactory academic performance and attendance.

Classroom policy

Students are required to bring to each class meeting a laptop or similar device for use in taking notes, summarizing in-class activities, and accessing the internet. However, use of mobile devices and computers during class for purposes other than viewing readings or conducting sanctioned research is not allowed. Cell phones must be silenced during class, but can be used for an emergency call. Students who receive or make calls or text messages or engage in other disruptive behavior during class will be asked to leave and will not be allowed to turn in the assignment due on that day. Students should also bring pen/pencil and paper to each class.

Academic Honesty Policy

Students must conform to UF's academic honesty policy regarding plagiarism and other forms of cheating. This means that on all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

The university specifically prohibits cheating, plagiarism, misrepresentation, bribery, conspiracy, and fabrication. For more information about the definition of these terms and other aspects of the Honesty Guidelines, see <http://www.dso.ufl.edu/sccr/process/student---conduct---honor---code/>. All students found to have cheated, plagiarized, or otherwise violated the Honor Code in any assignment for this course will be prosecuted to the full extent of the university honor policy, including judicial action and the sanctions listed in paragraph XI of the Student Conduct Code. For serious violations, you will fail this course.

Software Use

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate.

Accommodations for Students with Disabilities

Please do not hesitate to ask for accommodation for a documented disability. Students requesting Classroom accommodation must first register with the Dean of Students Office (<http://www.dso.ufl.edu/drp/>). The Dean of Students Office will provide documentation to the student, who must then provide this documentation to the Instructor when requesting accommodation. Please ask the instructor if you would like any assistance in this process. Please provide this information to your TA within the first two weeks of the semester.

Instructor Evaluation

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>.

Drop/Add/Withdrawal

A student can drop/add during the drop add period with no penalty. After drop/add, a student who drops will receive a W until the date listed in the academic calendar. After that date, the student may be assigned an "E" (fail). Note: it is the responsibility of the STUDENT to withdraw from a course, not the instructor. Failure to participate/complete the class is NOT a drop.

Additional Resources

Students facing difficulties completing the course or who are in need of counseling or urgent help may contact the Counseling and Wellness Center: <http://www.counseling.ufl.edu/cwc/Default.aspx>, 392-1575; or the University Police Department: 392-1111 or 9-1-1 for emergencies.

Other Resources available on-campus for students include:

- a. Student Mental Health, Student Health Care Center, 392-1171, personal counseling;
- b. Sexual Assault Recovery Services (SARS), Student Health Care Center, 392-1161, sexual counseling;

Grading Scheme Final Grade Calculation

10% In-class Activities (presentations and participation in class discussions), see below.

30% term paper

60% Mid-term and Final Exams

In-Class activities will involve reading assignments of 1 to 2 recently published scientific papers each week. You will be responsible for reading these papers, some of which you will lead group discussions on throughout the semester - total number to be determined by class size. Each person will also be required to write a review (approximately 200 words) on each paper assigned to them. The oral presentation (60%) will be evaluated based on clarity and comprehensiveness. The written review (40%) will be based on the quality of writing and the inclusiveness of key points in the paper. These presentations and paper reviews will represent 80% of your in-class activity grade, with the remaining 20% determined by your overall participation in all class discussions.

Term Paper: The first assignment for the writing of a term paper will be:

- 1) A potential title and a 1 page abstract (single spaced) that clearly defines the topic you have chosen with a general outline of your proposed paper.
- 2) On a separate page, a list of five references and your hypotheses and objectives. Any references

will be properly cited in the format of the journal Limnology and Oceanography (L&O).

The second assignment will consist of an annotated bibliography, with 20 properly cited references in the L&O format, along with any revisions on your hypotheses, and an outline of the “experimental approach” you will use to test your hypotheses. Each reference will have a 4 to 5-sentence summary of the important finding in the paper. At least 80% of these references must be from peer-reviewed literature.

The final term paper due on last day of class will be 15 pages of double-spaced text (excluding title page, tables, figures, references, acknowledgements, and appendices). The format will of the term paper and proposal will strictly follow that of L&O. Please consult the L&O (<http://www.aslo.org/>).

Final Grade Scale

A = 93% and up, A- = 90-93.99, B+ = 87-89.99, B = 83-86.99, B- = 80-82.99, C+ = 77-79.99, C = 73-76.99, C- = 70-72.99, D+ = 67-69.99, D = 63-66.99, D- = 60-62.99, F= <60

*Note: An earned grade of ‘C-’ grade or below does not qualify for major, minor, Gen Ed, or college basic distribution credit.

For further information on UF's Grading Policy, consult:

<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>
