

Cover Sheet: Request 12347

modification to Health Disparities in Society (HDS) minor

Info

Process	Minor Modify/Ugrad
Status	Pending at PV - University Curriculum Committee (UCC)
Submitter	Alyssa Zucker azucker@ufl.edu
Created	2/21/2018 3:46:02 PM
Updated	9/27/2018 12:34:22 PM
Description of request	We propose to enhance the structure and content of the 9 credits of electives that students in the HDS minor take. Currently they take one class each from three categories of electives. First, we propose refining to two categories of electives (three credits from Category A and six from category B). Second, we propose updating a number of the elective courses to better reflect advancements in the field and the mission and goals of the minor.

Earliest Available

Proposed Changes

Describe the proposed changes to the minor.

Response:
At present, students take 15 credits to complete the Health Disparities in Society (HDS) minor. Six of these credits come from WST 2322 - Introduction to Health Disparities in Society and WST 4941C - Practicum in Health Disparities, both of which are required courses; the current proposal does not affect these required classes. The other nine required credits must be filled by electives offered in three different categories related to the minor: Category 1 - Health or Social Science of Minority/Cultural Groups in US, Category 2 - Social Inequality and Related Theory, and Category 3 - International or Global Studies. Students currently take one elective course in each of these categories. We propose to refine the elective offerings to two pedagogically cohesive categories reflective of advances in the field: Category A - Theories of Social Inequality, Difference, and

Power, and Category B - Health Systems and Social Justice Mission. We propose to require one elective course for the proposed Category A and two elective courses for Category B. Thus, the minor would remain at 15 credits, with WST 2322 and WST 4941C as bookend courses. There would still be nine credits of electives, but they would be differently distributed.

Pedagogical Rationale/Justification

Describe the rationale for the proposed changes.

Response:

At the time this minor was created, there were few courses that could satisfy the minor's mission of critically examining the health disparities that exist at multiple levels of society (global, national, institutional, local, and personal) and among people of diverse geographic locations, linguistic groups, socioeconomic status, and sociocultural groups. This led to the creation of 3 categories: Category 1 - Health or Social Science of Minority/Cultural Groups in US, Category 2 - Social Inequality and Related Theory, and Category 3 - International or Global Studies. When the minor was created, few courses could meet both the requirements of what are presently Category 1 and 3 and continue to focus on health. We were required to count courses that were about the social science of minority groups generally (i.e., without a health focus) or that were about international culture, again often lacking emphasis on medicine, health, or health disparities. However, through growth in our unit and others in CLAS, there are now a sufficient number of courses that focus on both knowledge about diversity, minority groups, and power structures and health or medical outcomes. As there is a sufficient number of courses being offered that are more inherently related to the mission of the HDS minor, we find it logical to combine what are presently Category 1 - Health or Social Science of Minority/Cultural Groups in US, and Category 3 - International or Global Studies into Category B - Health Systems and Social Justice Mission. Having Category B instead of Categories 1 and 3 will allow students to take courses that are more specifically related to health systems and social justice missions on local, national, and transnational levels. As proposed Category B is essentially the combination of what are currently Categories 1 and 3, we also find it logical to require 6 credits from this proposed Category to give students the opportunity to learn in depth about health disparities faced by often-marginalized groups of people at local, national, and transnational levels.

Impact on Other Programs

Describe any potential impact on other programs or departments, including increased need for general education or common prerequisite courses, or increased need for required or elective courses outside of the existing program.

Response:

The proposed modifications for this minor all concern elective courses. To satisfy the requirements for the HDS minor, students will be required to take 9 credits of electives (as is the current requirement). As listed in the proposed changes in the course catalog, there are many courses available for students to take to complete the HDS elective minor requirement, but no specific course is required. Thus, there should be no impact on other programs or departments.

RE: UCC external consultation request

Hi Alyssa, I have now heard from my program directors. We request that Critical Issues in Public Health be retained. The syllabus was not the best reflection of the disparities content and both of my directors indicated this course meets the criteria you presented. We also offer a Global Health Disparities and Disabilities course which has been taught under HSC 4930 Special Topics for the past two or three years. We are submitting it for an official course number this summer (for consideration by the UCC in the fall), and it fits well with this minor. We are comfortable with removal of our other courses. Please note HSC 4624 is an HHP course. Stephanie

Stephanie Hanson, PhD, ABPP (Rp)

Subject: UCC external consultation request

Dear Dr. Hanson—

I am writing to request your consultation in my role as the undergraduate coordinator for Women's Studies, which is home to the Health Disparities in Society (HDS) minor. This 15 credit minor requires all students to take two bookend courses (WST2322 and WST4941C), as well as three electives from a list of options. As you may know, a number of Public Health courses are among those options:

PHC 3440 Global Public Health
PHC 3603 Critical Issues in Public Health
PHC 4101 Public Health Concepts
HSA 3111 U.S. Health Care System
HSC 3502 Survey of Diseases and Disabilities 1
HSC 4558 Survey of Diseases and Disabilities 2
HSC 4624 Trends in International Health

Over the past 18 months, a committee has worked on refining the HDS minor based on what we have learned in the past five years of offering the minor, advances in the field toward more explicit structural analysis and equity/justice framing, and changes in course offerings at UF. Among multiple refinements to the minor, one change we are proposing is to our elective structure. We have developed a new description of the elective category, "Health Systems and Social Justice Mission," which now includes course options that focus explicitly and substantially on how health systems are connected with equity and justice issues; that is, each course reflects a focus on both health systems AND equity and justice (rather than either/or).

The committee reviewed existing course descriptions and syllabi that were available online. Based on that information, and in line with the proposed modification, we would propose continuing to count:

PHC 3440 Global Public Health
PHC 4101 Public Health Concepts

but no longer counting:

HSA 3111 U.S. Health Care System
HSC 3502 Survey of Diseases and Disabilities 1
HSC 4558 Survey of Diseases and Disabilities 2
PHC 3603 Critical Issues in Public Health
HSC 4624 Trends in International Health

We invite your consultation and input on these course selections. I have enclosed the consultation form with this email. I would be very happy to discuss these proposed changes further if that would be useful.

Health Disparities in Society

Formatted Table

Health disparities describe the disproportionate burden of disease, lack of access to health care, and poorer health outcomes found among members of socially disenfranchised populations. Health disparities exist at multiple levels of society (global, national, institutional, local, and personal) and among people of diverse geographic locations, linguistic groups, socioeconomic status, and sociocultural groups. Housed in the Center for Gender, Sexualities, and Women's Studies Research (CGSWSR), the Health Disparities in Society (HDS) minor provides an interdisciplinary, intersectional framework to examine how multiple social identities (e.g., race, gender, sexual orientation, and socioeconomic status) intersect to reveal interlocking inequalities and preventable disparities in health. Housed in the Center for Gender, Sexualities, and Women's Studies Research (CGSWSR), the health disparities minor examines the ways in which ethnicity, national identity, race, class, ability, gender, sexual orientation, geography, education, and other factors create differential access to and quality of healthcare, producing disparate health outcomes.

About this Minor

College: [Liberal Arts and Sciences](#)

Credits: 15, completed with minimum grades of C and no optional S-U; [nine must be at the 3000-level or above](#)

[Related Women's Studies Programs](#)

Overview

Coursework will raise awareness among students about health disparities and establish a foundation for skill development and critical thinking about the assumptions that shape life science, medical research, and clinical practice. The minor will provide a framework that teaches students to integrate concepts of culture and health disparities into their personal and professional development.

Eligibility for the Minor

Due to the potential for significant overlap in coursework, Women's Studies majors must appeal to the CGSWSR for approval for the minor. Appeal forms are available in the department office in Ustler Hall.

Requirements for the Minor

No more than three credits of independent study may count toward the minor.

Students must complete a minimum of six credits of coursework exclusive to the minor that cannot count toward the major(s) or other minors.

Sometimes, and with the approval of the undergraduate coordinator for Women's Studies, students may petition to have other, relevant classes approved as substitutes within each category of electives within the minor. Such courses could include department *special topics* offering with numbers like 3930, 4930.

Each semester, courses offered for this minor are listed on the Women's Studies [courses](#) website.

Required Courses

Courses	Credits
WST 2322 Introduction to Health Disparities	3
WST 4941C Practicum in Health Disparities	3

"Please provide consult with Public health, credit hour requirements for categories A & B, and list out requested changes in the submission form." - [Casey Griffith](#)

1. I have attached email correspondence with Public Health. In line with this consultation, we are no longer seeking to remove PHC 3603, Critical Issues in Public Health from the list of electives. They have approved our other changes.
2. The credit hour requirements are: Category A (3 credits), Category B (6 credits)
3. Requested changes:
 - a. Remove the existing three tiers of electives.
 - b. Add two new tiers: Category A (Theories of Social Inequality, Difference, and Power) and Category B (Health Systems and Social Justice Mission)
 - c. Courses to be offered in Category A (students must take 3 credits from this list)

AFA 3332 Black Feminist and Womanist Theory

AFA 4430 Black Lives Matter

AMH 3340 History of Disability in America

ANT 3451 Race and Racism

ENG 4844 Queer Theory

HIS 3454 Racial Theories in Europe and the U.S.

SYD 3700 Minorities in American Society

SYO 4530 Social Inequality

WST 3015 Interdisciplinary Perspectives in WMS

WST 3415 Transnational Feminism

WST 3603 Sexualities Studies

WST 4641 Lesbian and Gay Studies

- d. Courses to be offered in Category B (students must take 6 credits from this list)

ANT 3478 Global Health Culture

ANT 4462 Culture and Medicine

GEO 3430 Population Geography

GEO 3452 Introduction to Medical Geography
