**Description**

Students will learn about the evolution, physiology, and molecular biology of Archaea including extremophiles. Principles of energy production and biosynthesis will be examined in aerobic and anaerobic habitats. Research that incorporates cutting-edge techniques and biotechnology applications for using archaea to solve real world problems will also be explored.

# Course|New for request 10800

## Info

**Request:** MCB4XXX Archaea and Biotechnology  
**Submitter:** Maupin, Julie A jmaupin@ufl.edu  
**Created:** 4/21/2016 1:13:32 PM  
**Form version:** 4

## Responses

**Recommended Prefix:** MCB  
**Course Level:** 4  
**Number:** xxx  
**Lab Code:** None  
**Course Title:** Archaea and Biotechnology  
**Transcript Title:** Archaea-Biotechnology  
**Effective Term:** Earliest Available  
**Effective Year:** Earliest Available  
**Rotating Topic?** No  
**Amount of Credit:** 3

## Repeatable Credit?

No

**S/U Only?** No  
**Contact Type:** Regularly Scheduled  
**Degree Type:** Baccalaureate

**Weekly Contact Hours:** 3  
**Category of Instruction:** Advanced  
**Delivery Method(s):** On-Campus, Online

## Course Description

Students will learn about the evolution, physiology, and molecular biology of Archaea including extremophiles. Principles of energy production and biosynthesis will be examined in aerobic and anaerobic habitats. Research that incorporates cutting-edge techniques and biotechnology applications for using archaea to solve real world problems will also be explored.

**Prerequisites**  
CHM 2211 (C) & (MCB 3020 or 3023) (C) & (MCB 3020L or 3023L) (C)  
**Co-requisites** none

**Rationale and Placement in Curriculum**  
Study of archaea will provide the student with a holistic understanding how life works. Current classes provide students with only limited knowledge of these microbes, which cluster to one of three domains of life and account for an estimated 20 percent of the world’s biomass. Archaea are critical to global carbon and nitrogen cycling and share deep evolutionary roots with eukaryotic cells. Due to their extremophilic properties and unusual metabolisms, Archaea also have the potential to produce methane gas and other useful products in a biobased economy.

**Course Objectives**  
- To become an expert on the molecular and cellular biology of Archaea.
- To gain the concepts and skills needed to understand and critically evaluate research articles that address Archaea biology.
- To creatively apply knowledge of Archaea biology to current problems (e.g. engineering Archaea for high level production of biofuels and renewable chemicals).

## Course Textbook(s) and/or Other Assigned Reading

**Textbook:**  
Other Assigned Reading:
References for Reading Material and Articles for Writing Assignments

Reeve, J.N. (1999). Archaeabacteria then ... Archaes now (are there really no archaeal pathogens?). J Bacteriol 181, 3613-3617.

Weekly Schedule of Topics COURSE SCHEDULE
Please note the following:
1. Biotechnology applications will be emphasized at the end of the semester BUT will also be integrated in lectures throughout the entire course schedule.
2. The citations listed as readings in the course schedule are referring to research articles/reviews compiled in a reference list at the end of the syllabus.

Note that all of the topics are focused on Archaea (not Bacteria or Eukaryotes), thus, no course overlap is anticipated.
Week 1
M 05/09 The Archaea: an Invitation to Evolution
   Readings: (Ch. 1 - textbook) and (Spang et al., 2015)
T 05/10 General Characteristics and Important Model Organisms
   Readings: (Ch. 2 - textbook)
W 05/11 DNA Replication and Cell Cycle
   Readings: (Ch. 3 - textbook) and (Lindås and Bernander, 2013)
R 05/12 DNA-Binding Proteins and Chromatin
   Readings: (Ch. 4 - textbook) and (Koster et al., 2015)
F 05/13 Catch up and Review Material (meet in class/online)

Week 2
T 05/10 General Characteristics and Important Model Organisms
   Readings: (Ch. 2 - textbook)
W 05/11 DNA Replication and Cell Cycle
   Readings: (Ch. 3 - textbook) and (Lindås and Bernander, 2013)
R 05/12 DNA-Binding Proteins and Chromatin
   Readings: (Ch. 4 - textbook) and (Koster et al., 2015)
F 05/13 Catch up and Review Material (meet in class/online).

Week 3
M 05/23 Exam 1 (all material/lectures covered in Week 1)
T 05/24 Mechanisms of Genome Stability and Evolution
   Readings: (Ch. 5 - textbook) and (Shin et al., 2014)
W 05/25 Transcription: Mechanism and Regulation
   Readings: (Ch. 6 - textbook) and (Peeters et al., 2015)
R 05/26 Central Metabolism - Heterotrophic
   Readings: (Ch. 12 - textbook) and (Schönheit et al., 2015)
F 05/27 Solute Transport
   Readings: (Ch. 16 - textbook) and (Albers et al., 2001)

Week 4
M 05/30 Memorial Day
T 05/31 Exam 2 (all material/lectures covered in Week 2)
W 06/01 Ammonia Oxidizing Archaea
   Readings: (Stahl and de la Torre, 2012)
R 06/02 Bioenergetics of Extreme Energy Limitation
   Readings: (Mayer and Müller, 2014)
F 06/03 Proteinaceous Surface Layers: Ultrastructure and Biochemistry
   Readings: (Ch. 14 - textbook) and (Ellen et al., 2010)

Week 5
M 06/06 Lipids: Biosynthesis, Function, and Evolution
   Readings: (Ch. 15 - textbook) and (Koga, 2012)
T 06/07 Solute Transport
   Readings: (Ch. 16 - textbook) and (Albers et al., 2001)
W 06/08 Protein Translocation into and across Archaeal Cytoplasmic Membranes
   Readings: (Ch. 17 - textbook) and (Pohlschröder et al., 2005)
R 06/09 Catch up and Review Material (meet in class/online)
F 06/10 Exam 4 (all material/lectures covered in Weeks 4-5)

Week 6
M 06/13 Flagellation and Chemotaxis
   Readings: (Ch. 18 - textbook) and (Briegel et al., 2015)
T 06/14 Structure and Evolution of Genomes
Readings: (Ch. 19 - textbook)  
Functional Genomics and Molecular Genetics of Archaea  
Readings: (Ch. 20 and 21 - textbook)

W 06/15  Biotechnology
Readings: (Ch. 22 - textbook) and (Zeldes et al., 2015)
R 06/16  Catch up and Review Material (meet in class/online)
F 06/17  Exam 5 (all material/lectures covered in Week 6)

**Grading Scheme**  Learning will be evaluated based on the following criteria:
500 points (5 exams × 100 points each)  
200 points (4 written assignments × 50 points each)  
+50 points (extra credit, optional)  
700 points total

Exams (5 exams × 100 points each): Five equally weighted exams are scheduled throughout the semester (see course schedule for details on exam times). Each exam is worth 100 points. The final cumulative exam is optional and can be used to replace the lowest score of your Exam 1 to 5 scores. All exams will focus on the material covered in the online class lectures which are based on textbook and other scientific literature as noted in the syllabus. The student should first read the textbook chapters and references noted in course outline, second print out the lecture notes (in pdf format, online) and finally watch the online lectures to enhance understanding of the material. The exams are multiple choice/short answer and will be administered through Canvas e-learning by ProctorU services (http://www.proctoru.com/index.php). ProctorU allows you to take your exam on demand or by appointment. All appointments should be made at least 3 days in advance. To make an appointment, simply create an account at http://go.proctoru.com, log in, click on the “new exam” link and select the exam, date, and time you desire. You will receive a confirmation email of your reservation at the email address that you provided to ProctorU. Reservations made within 72 hours of your exam are subject to a $5 late reservation fee. Students without an appointment can take their exam on demand within 15, 30 or 45 minutes utilizing “Take it Now”. This premiere feature is designed to give test takers added convenience and only costs $8.75. Late registrations and “Take it Now” are subject to availability.

Assignments (4 x 50 points each): Written assignments related to lecture material are due throughout the semester. The goal of these assignments is to enhance your understanding of the lecture material. The assignments also provide you with the opportunity to read scientific literature (outside of the textbook) and express yourself in written format (not simply answer multiple choice questions).

For each assignment (4 x 50 points each), students must:

a. Choose one research review/article among a list of references provided by the instructor at the beginning of the semester.

b. Obtain a copy of the assigned research article/review as soon as possible to allow time for reading the material. Please note that all of the assigned literature is available online FREE of charge to UF students in pdf format through Medline or the UF library at http://www.uflib.ufl.edu/ (be sure to sign in via off-campus access if using a computer that is not linked to the UF mainframe). Please see the course instructor if you require assistance in gaining free access (you should not have to pay for this service).

c. Read the assigned research article/review as soon as possible.

d. Write a 500 word summary of the research article/review. The summary should be at least 500 words (typed) and encompass the major points. You will not receive a higher grade if you go over 700 words so please keep your summary focused. Discussion of future directions and applications is appropriate.

e. DO NOT PLAGIARIZE (see http://web.uflib.ufl.edu/msl/07b/studentplagiarism.html for details).

f. Upload the assignment onto Canvas (e-learning course website) by no later than
11:59 PM on the date of the deadline. Deadlines are posted below and are in the “COURSE SCHEDULE”. Submit only one attachment per assignment. Only use file types: Word, PDF, HTML, RTF, or plain text. Always include the file extension.

Extra Credit (50 points, optional):

Please provide a comprehensive single 700 word summary that includes a brief discussion of your opinion regarding John Reeve’s bold question “Archaebacteria then ... Archaes now (are there really no archaenal pathogens?)” (Reeve, 1999) with supporting evidence from recent human microbiome studies [for supporting evidence see reviews by (Bang and Schmitz, 2015) and (Dridi et al., 2011)].

**Instructor(s)** Julie Maupin-Furlow, Professor
Archaea and Biotechnology

MCB 4XXX/6XXX, Summer A 2016 (annually)

Instructor
Julie A. Maupin-Furlow, PhD.

Contact information: email:jmaupin@ufl.edu, Department of Microbiology and Cell Science, office location Microbiology and Cell Science Bldg 981 Museum Rd., Rm 1053 phone 352-392-4095, office hours Tuesday/Thursday 3-4 PM or by appointment

Preferred methods for communication with the instructor regarding the course are by email.

Please resolve technical issues by contacting the UF helpdesk (e.g. http://helpdesk.ufl.edu; (352) 392-HELP (4357); helpdesk@ufl.edu · HUB 132).

Delivery Method/Meeting time
ALL LECTURES, EXAMS, ASSIGNMENTS AND QUESTION /ANSWER SESSIONS WILL BE AVAILABLE ONLINE. Weekly in class discussion/review sessions will be held on campus (Building/room TBD) for students to ask questions and interact with their instructor (see class schedule for meeting times). The sessions will be taped for those students who attend the class online. In total, the online/in-class meetings will be equivalent to 75 min per day for 6 weeks.
Credits - 3

Course Description

MCB 4xxx/6xxx. Archaea and Biotechnology. Credits: 3; Prereq: CHM 2211 (C) & (MCB 3020 or 3023) (C) & (MCB 3020L or 3023L) (C). Students will learn about the evolution, physiology, and molecular biology of Archaea including extremophiles. Principles of energy production and biosynthesis will be examined in aerobic and anaerobic habitats. Research that incorporates cutting-edge techniques and biotechnology applications for using archaea to solve real world problems will also be explored.

Course Objectives/Goals/Learning Outcomes

- To become knowledgeable on the molecular and cellular biology of Archaea.
- To gain the concepts and skills needed to understand and critically evaluate research articles that address Archaea biology.
- To creatively apply knowledge of Archaea biology to current problems (e.g. engineering Archaea for high level production of biofuels and renewable chemicals).

Course Material and Assignments

All required course materials will be available through the Canvas e-Learning site (http://elearning.ufl.edu/). Instructions for and submission of assignments will also be through Canvas.

Exams (5 exams × 100 points each):

- Five equally weighted exams are scheduled throughout the semester (see course schedule for details on exam times). Each exam is worth 100 points. The final cumulative exam is optional and can be used to replace the lowest score of your Exam 1 to 5 scores.
- All exams will focus on the material covered in the online class lectures which are based on textbook and other scientific literature as noted in the syllabus. The student should first read the textbook chapters and references noted in course outline, second print out the lecture notes (in pdf format, online) and finally watch the online lectures to enhance understanding of the material.
- The exams are multiple choice/short answer and will be administered through Canvas e-learning by ProctorU services (http://www.proctoru.com/index.php). ProctorU allows you to take your exam on demand or by appointment. All appointments should be made at least 3 days in advance. To make an appointment, simply create an account at http://go.proctoru.com, log in, click on
the “new exam” link and select the exam, date, and time you desire. You will receive a confirmation email of your reservation at the email address that you provided to ProctorU. Reservations made within 72 hours of your exam are subject to a $5 late reservation fee. Students without an appointment can take their exam on demand within 15, 30 or 45 minutes utilizing “Take it Now”. This premiere feature is designed to give test takers added convenience and only costs $8.75. **Late registrations and “Take it Now” are subject to availability.**

**Assignments (4 x 50 points each):**

- Written assignments related to lecture material are due throughout the semester. The goal of these assignments is to enhance your understanding of the lecture material. The assignments also provide you with the opportunity to read scientific literature (outside of the textbook) and express yourself in written format (not simply answer multiple choice questions).
- For each assignment, students must:
  a. **Choose one research review/article among a list of references provided by the instructor at the beginning of the semester.**
  b. Obtain a copy of the assigned research article/review as soon as possible to allow time for reading the material. Please note that all of the assigned literature is available online FREE of charge to UF students in pdf format through Medline or the UF library at [http://www.uflib.ufl.edu/](http://www.uflib.ufl.edu/) (be sure to sign in via off-campus access if using a computer that is not linked to the UF mainframe). Please see the course instructor if you require assistance in gaining free access (you should not have to pay for this service).
  c. Read the assigned research article/review as soon as possible.
  d. **Write a 700 word summary of the research article/review.** The summary should be at least 700 words (typed) and encompass the major points. You will not receive a higher grade if you go over 700 words so please keep your summary focused. Discussion of future directions and applications is appropriate.
  e. **DO NOT PLAGIARIZE** (see [http://web.uflib.ufl.edu/msl/07b/studentplagiarism.html](http://web.uflib.ufl.edu/msl/07b/studentplagiarism.html) for details).
  f. Upload the assignment onto Canvas (e-learning course website) by no later than 11:59 PM on the date of the deadline. Deadlines are posted below and are in the “COURSE SCHEDULE”. Submit only one attachment per assignment. Only use file types: Word, PDF, HTML, RTF, or plain text. Always include the file extension.
     1. Summary of (Spang et al., 2015) – Due F 05/13
     2. Summary of (Shin et al., 2014) - Due F 05/20
     3. Summary of (Lopez et al., 2015) - Due F 05/27
     4. Summary of (Mayer and Müller, 2014) - Due M 06/06
Extra Credit (50 points, optional):

- Please provide a comprehensive single 700 word summary that includes a brief discussion of your opinion regarding John Reeve’s bold question “Archaeobacteria then ... Archaea now (are there really no archaeal pathogens?)” (Reeve, 1999) with supporting evidence from recent human microbiome studies [for supporting evidence see reviews by (Bang and Schmitz, 2015) and (Dridi et al., 2011)].

MCB6000 level Summary Paper (Graduate Students ONLY):

- The summary paper is an overview of a topic related to prokaryotic biochemistry, metabolism and/or cell physiology of interest to you. The paper must be typed (double-spaced with 1 inch margins). The summary paper should include 10 pages of text plus extra pages for references, a title page and figures (the latter is optional but enhances the ability to convey the information within the text). The paper is not a summary of your graduate research findings but is instead a summary of peer-reviewed research articles that have been published in scientific journals.
- Please contact the instructor early in the semester to discuss the topic of your summary paper (including potential references you will use for the final paper). This discussion will enable me to confirm that your topic is relevant to the area of prokaryotic cell structure and function and has an adequate amount of information available to write a comprehensive summary.
- Please upload the paper through Canvas e-learning by the deadline indicated on the class schedule. Note that your submission will be automatically scanned by TurnItIn for plagiarism. If you need assistance in understanding what is considered plagiarism please ask me.
- Please use the Journal “Cell” for citation and reference formats: http://www.cell.com/cell/authors
- You are highly encouraged to use “EndnoteWeb” as your reference management software – it’s free for UF students http://web.uflib.ufl.edu/endnoteweb.html

Evaluation of Learning/Grades

MCB4xxx learning will be evaluated based on the following criteria:
500 points (5 exams × 100 points each)
200 points (4 written assignments × 50 points each)
+50 points (extra credit, optional)
700 points total

MCB6xxx learning will be evaluated based on the following criteria:
500 points (5 exams × 100 points each)
200 points (4 written assignments × 50 points each)
200 points (summary paper/project – this is only for the MCB6000 level course)
+50 points (extra credit, optional)
900 points total

[Materials and Supplies Fees]
There are no additional fees for this course.
Grading Policy
Final grades will be based on the following performance standard:

95 - 100 % = A
90 - 94 % = A-
87 - 89 % = B+
84 - 86 % = B
80 - 83 % = B-
77 - 79 % = C+
74 - 76 % = C
70 - 73 % = C-
60 - 69 % = D
Less than 60 % = E

More information on grades and grading policies is here:
https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

Class Attendance and Make-Up Policy
Excused absences are consistent with university policies in the undergraduate catalog (https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx) and require appropriate documentation. Excused absences from exams and/or assignments (e.g., illness, serious family emergency, military obligations, religious holidays) must be communicated by formal signed documentation to the instructor prior to the missed exam or assignment. Appropriate documentation MUST be provided for the absence caused by serious illness, accident, jury duty or death in the immediate family. You MUST contact the instructor IN ADVANCE of the missed exam or assignment. An alternative time for the exam and/or assignment will be arranged by the instructor.

Students Requiring Accommodations
Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

Campus Resources
Resources are available on campus for students having personal problems or lacking clear career and academic goals, which interfere with their academic performance. These resources include:
Health and Wellness

- U Matter, We Care: If you or a friend is in distress, please contact umatter@ufl.edu or 352 392-1575 so that a team member can reach out to the student.
- Counseling and Wellness Center: http://www.counseling.ufl.edu/cwc/Default.aspx, 392-1575;
- Sexual Assault Recovery Services (SARS) at the Student Health Care Center, 392-1161.
- For emergencies call: University Police Department, 392-1111 (or 9-1-1 for emergencies). http://www.police.ufl.edu/

Academic Resources

- E-learning technical support, 352-392-4357 (select option 2) or e-mail to Learning-support@ufl.edu. https://lss.at.ufl.edu/help.shtml.
- Library Support, http://cms.uflib.ufl.edu/ask. Various ways to receive assistance with respect to using the libraries or finding resources.
- Teaching Center, Broward Hall, 392-2010 or 392-6420. General study skills and tutoring. http://teachingcenter.ufl.edu/

Course Evaluation

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at https://evaluations.ufl.edu. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results/.

Class demeanor

Students are expected to arrive to class on time and behave in a manner that is respectful to the instructor and to fellow students. Please avoid the use of cell phones and restrict eating to outside of the classroom. Opinions held by other students should be respected in discussion, and conversations that do not contribute to the discussion should be held at minimum, if at all.

Netiquette guide for online courses

It is important to recognize that the online classroom is in fact a classroom, and certain behaviors are expected when you communicate with both your peers and your instructors. These guidelines for online behavior and interaction are known as
University Honesty Policy
UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code (https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Software Use
All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Microsoft Office 365 Software is free for UF students
http://www.it.ufl.edu/gatorcloud/free-office-365-downloads/

Other free software is available at:
http://www.software.ufl.edu/

To check for availability of the media and technical requirements, contact the UF Computing Help Desk at (352)392-HELP(4357).

University of Florida Complaints Policy and Student Complaint Process
Most problems, questions and concerns about the course will be resolved by professionally communicating with the instructor or the TAs.

The University of Florida believes strongly in the ability of students to express concerns regarding their experiences at the University. The University encourages its students who wish to file a written complaint to submit that complaint directly to the department that manages that policy.

If a problem really cannot be resolved by communicating with the instructor or the TAs you can contact

• Online Course: http://www.distance.ufl.edu/student-complaint-process.

University of Florida U Matter

Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact umatter@ufl.edu so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392-1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.
Re: Archaea and Biotechnology Course

Hi there,

This sounds like a great class. One I’d enjoy taking in all my free time! No conflicts.

Thank you for consulting us.
Marta

Dear Marta/David,

Hope all is well. This email is just a followup on the email I sent last week regarding the need for the Department of Biology to address potential overlap with the course I propose entitled "Archaea and Biotechnology". Attached is the syllabus. Please note that my research expertise is in the Biochemistry, Genetics and Molecular Biology of Archaea - which will provide a nice perspective for the undergraduate/graduate students enrolled in this course.

Thanks for your help on this matter.

With best regards,
Julie

Subject: Archaea and Biotechnology Course

Dear Marta,

Hope all is well for you. Attached please find a syllabus for the course "Archaea and Biotechnology" that is proposed to be offered through the Department of Microbiology and Cell Science. Concern was raised at the recent CALS curriculum committee that there could be overlap in content with courses offered in the Department of Biology. The course is focused on the physiology and biochemistry of Archaea which is not offered at UF to my knowledge. Can you please address this concern by way of a letter or email of response to me? I will modify the course accordingly to prevent overlap if needed and update the committee.

Thanks,

Julie
