Weekly Contact Hours 3

Course Description This course provides a fundamental understanding of health care information systems and infographics. Key topics will include: electronic health records, computerized provider order entry, telemedicine, HIPAA privacy and security regulations, and cyber-security.
Prerequisites Upper division standing
Co-requisites Upper division standing

Rationale and Placement in Curriculum Health informatics is a multidisciplinary profession encompassing Dental Informatics, Nursing Informatics, Pharmacy Informatics, Public Health Informatics and other medical specialties that integrate computer technology to improve healthcare, health education and biomedical research.

Health Informatics professionals are in demand as the healthcare systems in the U.S. continuously evolves with the advances in technology,

The course objectives, assignments, and activates are designed to contribute towards mastery of key competencies in the Health Sciences and Public Health bachelor degree curriculums.

Course Objectives • Apply the systems development life cycle (SDLC) process to a case scenario to fit with the strategic business plan of an organization.
Health Sciences Learning Outcomes and Public Health Bachelor Degree Domains
The fundamental concepts and features of project implementation, including planning, assessment and evaluation (D10.5)

- Identify and discuss the key elements of the HIPAA Security Rule from a recent HIPAA violation in the news.

Health Sciences Learning Outcomes and Public Health Bachelor Degree Domains
Apply knowledge and application of core bioethical principles to contemporary health issues (SLO 4)
Basic concepts of legal, ethical, economic and regulatory dimensions of health care and public health policy and the roles, influences and responsibilities of the different agencies and branches of government (D10.7)

- Identify barriers and legal, ethical, and regulatory issues associated with technology-based connection and engagement strategies.

Health Sciences Learning Outcomes and Public Health Bachelor Degree Domains
Apply knowledge and application of core bioethical principles to contemporary health issues (SLO 4)
Basic concepts of legal, ethical, economic and regulatory dimensions of health care and public health policy and the roles, influences and responsibilities of the different agencies and branches of government (D10.7)

- Define the roles of federal, state, and local public health agencies in the development of public health informatics.

Health Sciences Learning Outcomes and Public Health Bachelor Degree Domains
Describe key elements of the U.S. healthcare system. (SLO 1)
The fundamental characteristics and organizational structures of the US health system as well as the differences between systems in other countries (D10.6)

- Evaluate evidence-based practice and translational research.

Health Sciences Learning Outcomes and Public Health Bachelor Degree Domains
Develop and apply critical analysis skills to contemporary health issues (SLO 6)
The basic concepts, methods and tools of public health data collection, use and analysis and why evidence-based approaches are an essential part of public health practice (D10.2)
Basic concepts of public health-specific communication, including technical and professional writing and the use of mass media and electronic technology (D10.8)

Course Textbook(s) and/or Other Assigned Reading
Textbooks:

Online Resources: Carnegie Mellon University Open Learning Initiative
https://oli.cmu.edu/

Additional Materials:
Selected supplemental websites and articles will be posted on Canvas. You are responsible for all supplemental readings. Supplemental material will be discussed in class and included on tests.
PowerPoint presentations will be posted on the course website however will not always be available before class. Material provided in the PowerPoint presentations is intended to
supplement the course material and information discussed in class.

**Weekly Schedule of Topics**  Week 1
Topics & Assignments  
Course Introduction & Syllabus Review  
Informatics, Disciplinary Science, and the Foundation of Knowledge  
Readings  
Chapter 1- Mastrian & McGonigle  
Data, Information, Knowledge, Wisdom (DIKW): A Semiotic Theoretical and Empirical Exploration of the Hierarchy and its Quality Dimension by Sasa Baskarada, Andy Koronios  

Week 2  
Topics & Assignments  
Introduction to Information, Information Science, and Information Systems  
DS1 Assignment  
Readings  
Chapter 2- Mastrian & McGonigle  

Week 3  
Topics & Assignments  
Computer Science and the Foundation of Knowledge Model  
Readings  
Chapter 3- Mastrian & McGonigle  

Week 4  
Topics & Assignments  
Introduction to Cognitive Science, Informatics and Artificial Intelligence  
Readings  
Chapter 4- Mastrian & McGonigle  

Week 5  
Topics & Assignments  
Ethical and Legal Aspects of Health Informatics  
DS2 Assignment

Prerequisites
Upper division standing

PURPOSE AND OUTCOME

Course Overview
This course provides a fundamental understanding of health care information systems and infographics, starting with an overview of clinical and administrative information systems used in health care. Key topics will include: electronic health records, computerized provider order entry, telemedicine, HIPAA privacy and security regulations, and cyber-security. The second half of the course will provide an in-depth look at current information technologies to include health social media, health sensors, wearables, and smartphone-based health technologies to gain an understanding of the emerging role of health informatics.

Relation to Program Outcomes
The course objectives, assignments, and activates are designed to contribute towards mastery of key competencies in the Health Sciences and Public Health bachelor degree curriculums.

Course Objectives

- Apply the systems development life cycle (SDLC) process to a case scenario to fit with the strategic business plan of an organization.
- Identify and discuss the key elements of the HIPAA Security Rule from a recent HIPAA violation in the news.
- Identify barriers and legal, ethical, and regulatory issues associated with technology-based connection and engagement strategies.
- Define the roles of federal, state, and local public health agencies in the development of public health informatics.
- Evaluate evidence-based practice and translational research.

### Instructional Methods

The course is housed in UF e-Learning in Canvas. This course is blended taught through a discussion and lecture format with online “Blended Learning” assignments. Your participation in the class is vital to its success. I expect you to be prepared and ready to participate in each class. If voluntary participation lags, I will call upon students at random.
Blended Learning
Throughout the semester several Blended Learning assignments will be uploaded in Canvas.

What is blended learning and why is it important?
A Blended Learning class uses a mixture of technology and face-to-face instruction to help you maximize your learning. Knowledge content that, as the instructor, I would have traditionally presented during a live class lecture is instead provided online before the live class takes place. This lets me focus my face-to-face teaching on course activities designed to help you strengthen higher order thinking skills such as critical thinking, problem solving, and collaboration. Competency in these skills is critical for today’s health professional.

What is expected of you?
You are expected to actively engage in the course throughout the semester. You must come to class prepared by completing all out-of-class assignments. This preparation gives you the knowledge or practice needed to engage in higher levels of learning during the live class sessions. If you are not prepared for the face-to-face sessions, you may struggle to keep pace with the activities occurring in the live sessions, and it is unlikely that you will reach the higher learning goals of the course. Similarly, you are expected to actively participate in the live class. Your participation fosters a rich course experience for you and your peers that facilitates overall mastery of the course objectives.

DESCRIPTION OF COURSE CONTENT

Topical Outline/Course Schedule
All reading assignments including supplemental readings should be read prior to class to facilitate your learning and class discussions. If you miss class, it is your responsibility to obtain notes, handouts, and summary of the lesson/class activities from the missed class. The syllabus and course schedule is subject to revision. Confirm deadlines in class and always check Canvas for updates.

Course Materials and Technology

Textbooks:

Online Resources: Carnegie Mellon University Open Learning Initiative [https://oli.cmu.edu/](https://oli.cmu.edu/)

Additional Materials:
Selected supplemental websites and articles will be posted on Canvas. You are responsible for all supplemental readings. Supplemental material will be discussed in class and included on tests. PowerPoint presentations will be posted on the course website however will not always be available before class. Material provided in the PowerPoint presentations is intended to supplement the course material and information discussed in class.

For technical support for this class, please contact the UF Help Desk at:
- Learning-support@ufl.edu
- (352) 392-HELP - select option 2
- [https://lss.at.ufl.edu/help.shtml](https://lss.at.ufl.edu/help.shtml)
ACADEMIC REQUIREMENTS AND GRADING

Assignments

Tests
Tests are largely multiple choice and 1-3 short answer questions. The tested material includes the PowerPoint, lectures, class discussions, team presentations, assigned readings in the textbook and supplemental readings. The tests focus on the information presented since the previous test and are not cumulative. However, many of the concepts learned in the beginning of class are built upon and repeated or applied in subsequent tests.

Presentations Guidelines
Create and give a presentation (PowerPoint, iMovie, Moviemaker, etc.) which addresses your assigned topics. Reference the material from the course and current supporting articles. Areas to consider:
• Current I.T. issues that healthcare leaders need to know.
• Best practices that can be emulated by other organizations.
• Relevant laws and regulations to be considered.
• Challenges and complexities of informatics issues.
The presentation should be formatted as follows:
• Title slide (names, date and topics)
• Learning objectives
• Presentation outline
• Presentation slides/images with APA in-text citations
• Current events, relevant case studies, and/or relevance to healthcare
• Conclusion
• Two discussion questions
• APA Reference Slide(s)
Day of the presentation please provide:
• A printed hard copies of the presentation (6 slide handout or equivalent) to the TA and the professor at the beginning of class.

The presentations will be evaluated in accordance with a rubric posted online. The presentation should be less than 20 minutes (including a metacognition format question and answer period). Your presentation should add depth to course with pertinent information on future developments that will benefit your classmates. The current articles you choose should provide your audience new knowledge about the potential populations their organizations may serve in the rapidly evolving healthcare landscape.
The grade for the presentation will be given to each member of the team.

Papers
The assignments are based on materials in the modules of the course. An outline of what is required in the papers is listed below. Consider the following questions when writing your reflective paper:
• What was your prior knowledge of the subject matter contained in the section of the course?
• After exploring the materials in this section, what is your current thinking on the subjects presented?
• How will this information affect your discipline?
Length: 800 words minimum; 1000 words maximum; 12 pt. font (Arial, Times New Roman); double spaced

Process: Paper will be submitted in Canvas in the Assignment and will be checked through Turnitin.
Instructions:
Answer the questions listed in the overview using your own experiences and specific examples from the videos and readings presented in this section. You do not need to provide summaries, but you should include details from the course materials that give evidence to:
• your thorough review of the materials
• your ability to analyze the materials and make inferences
• your ability to synthesize the course content
A rubric will be provided in the assignment in Canvas.
Quizzes
Quizzes are to be completed online via the course website on Canvas. Quizzes must be completed individually with no aids and will be random in class or posted in Canvas. Disallowed aids include but are not limited to class notes, books, online resources, or other people. Students may not discuss any aspect of a quiz with classmates or others until after the quiz due date/time has passed. Potential schedule conflicts preventing a student from completing a quiz by the due date should be reported to the TA as soon as possible before the quiz becomes available on the course website. Any technical issues should be initially reported via email to the TA prior to the quiz end date/time. Make-up quizzes due to technical difficulties will not be considered otherwise.

Professionalism & Participation
Your participation in the class is vital to its success. I expect you to be prepared and ready to participate in each class. If voluntary participation lags, I will call upon students at random. Part of the professionalism grade covers the electronics policy for guest lectures and presentations.

Point system used (i.e., how do course points translate into letter grades). The cutoff point for an A is 93.00 not 95.00. Since 7 points is a generous spread for an A there will be no rounding for other grade increments, for example a 92.99 is an A-.

For greater detail on the meaning of letter grades and university policies related to them, see the Registrar’s Grade Policy regulations at: http://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx
Exam Policy

Policy Related to Make up Exams or Other Work
Please note: Any requests for make-ups due to technical issues MUST be accompanied by the ticket number received from LSS when the problem was reported to them. The ticket number will document the time and date of the problem. You MUST e-mail me within 24 hours of the technical difficulty if you wish to request a make-up.

Policy Related to Required Class Attendance
Class attendance is a critical component of the learning process, therefore attendance is mandatory.

Attendance will be taken every class Canvas. Greater than fifteen minutes late is penalized.

All faculty are bound by the UF policy for excused absences. For information regarding the UF Attendance Policy see the Registrar website for additional details:
https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx

STUDENT EXPECTATIONS, ROLES, AND OPPORTUNITIES FOR INPUT

Expectations Regarding Course Behavior

Electronic Device Policy
Electronic Devices:
Use of electronic devices (laptops, tablets, and cell phones) is not permitted during guest lectures and presentations. The necessity of classroom interaction in this course negates the usefulness of electronic devices as a note-taking device. The use of your electronic device during class can also prove distracting to your classmates, so please refrain from using your electronic device during class. See professionalism and participation for consequences if these guidelines are not followed.

When use of electronic devices is permitted please adhere to the following-
- Charge your device fully before coming to class.
- Set your laptop volume control to mute or off before coming to class.
- Remember to always keep your laptop closed during presentations and other specific in-class activities.
- Do not engage in unauthorized communication or entertainment (web surfing, instant messaging, chat room chatting, DVD viewing, music playing, game playing, etc.) during class unless it is part of the lesson.

Attendance:
Students are expected to arrive for class on time, be prepared and ready to participate in class discussions. Class attendance is a critical component of the learning process; therefore, attendance is mandatory.
Attendance will be taken every class and recorded in Canvas. A sign-in sheet will be circulated at or near the beginning of class. You are responsible for signing in each class whether you arrive on time or late. If you miss class chapter reviews need to be submitted before the next class. Personal issues related to class attendance or fulfillment of course requirements will be handled individually. Extra credit is available because absences have been worked into the roll call grade. After the fourth absence formal documentation will be required for each instance for review of compliance with the UF policy for excused absences.

Make-up Work
It is your responsibility to obtain notes, handouts, and summary of the lesson/class activities from the missed class. Also, if you miss a class you will need to submit chapter reviews before the next class. The syllabus and course schedule is subject to revision. Confirm deadlines in class and always check Canvas for updates.

Late Policy:
Only with permission and based on exigent, excusable circumstances will I accept late assignments. I reserve the right to penalize late assignments as deemed appropriate.
Communication Guidelines
If you anticipate turning in an assignment late, notify the TA with as much advanced notice as possible.

Academic Integrity

Students are expected to act in accordance with the University of Florida policy on academic integrity. As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge:

“We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.”

You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied:

“Oh my honor, I have neither given nor received unauthorized aid in doing this assignment.”

It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For additional information regarding Academic Integrity, please see Student Conduct and Honor Code or the Graduate Student Website for additional details:
https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/
http://gradschool.ufl.edu/students/introduction.html

Please remember cheating, lying, misrepresentation, or plagiarism in any form is unacceptable and inexcusable behavior.

Online Faculty Course Evaluation Process
Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at https://evaluations.ufl.edu. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results/.

SUPPORT SERVICES

Accommodations for Students with Disabilities
If you require classroom accommodation because of a disability, you must register with the Dean of Students Office http://www.dso.ufl.edu within the first week of class. The Dean of Students Office will provide documentation of accommodations to you, which you then give to me as the instructor of the course to receive accommodations. Please make sure you provide this letter to me by the end of the second week of the course. The College is committed to providing reasonable accommodations to assist students in their coursework.

Counseling and Student Health
Students sometimes experience stress from academic expectations and/or personal and interpersonal issues that may interfere with their academic performance. If you find yourself facing issues that have the potential to or are already negatively affecting your coursework, you are encouraged to talk with an instructor and/or seek help through University resources available to you.

- The Counseling and Wellness Center 352-392-1575 offers a variety of support services such as psychological assessment and intervention and assistance for math and test anxiety. Visit their website for more information: http://www.counseling.ufl.edu. On line and in person assistance is available.
- You Matter We Care website: http://www.umatter.ufl.edu/. If you are feeling overwhelmed or stressed, you can reach out for help through the You Matter We Care website, which is staffed by Dean of Students and Counseling Center personnel.
• The Student Health Care Center at Shands is a satellite clinic of the main Student Health Care Center located on Fletcher Drive on campus. Student Health at Shands offers a variety of clinical services. The clinic is located on the second floor of the Dental Tower in the Health Science Center. For more information, contact the clinic at 392-0627 or check out the web site at: https://shcc.ufl.edu/
• Crisis intervention is always available 24/7 from:  
  Alachua County Crisis Center  
  (352) 264-6789  
  http://www.alachuacounty.us/DEPTS/CSS/CRISISCENTER/Pages/CrisisCenter.aspx

Do not wait until you reach a crisis to come in and talk with us. We have helped many students through stressful situations impacting their academic performance. You are not alone so do not be afraid to ask for assistance.

**College of Public Health and Health Professions Inclusive Learning Environment:**

Public health and health professions are based on the belief in human dignity and on respect for the individual. As we share our personal beliefs inside or outside of the classroom, it is always with the understanding that we value and respect diversity of background, experience, and opinion, where every individual feels valued. We believe in, and promote, openness and tolerance of differences in ethnicity and culture, and we respect differing personal, spiritual, religious and political values. We further believe that celebrating such diversity enriches the quality of the educational experiences we provide our students and enhances our own personal and professional relationships. We embrace The University of Florida’s Non-Discrimination Policy, which reads, “The University shall actively promote equal opportunity policies and practices conforming to laws against discrimination. The University is committed to non-discrimination with respect to race, creed, color, religion, age, disability, sex, sexual orientation, gender identity and expression, marital status, national origin, political opinions or affiliations, genetic information and veteran status as protected under the Vietnam Era Veterans’ Readjustment Assistance Act.” If you have questions or concerns about your rights and responsibilities for inclusive learning environment, please see your instructor or refer to the Office of Multicultural & Diversity Affairs website: www.multicultural.ufl.edu
Why Study Health Informatics & Social Media?

Health informatics is a multidisciplinary profession encompassing Dental Informatics, Nursing Informatics, Pharmacy Informatics, Public Health Informatics and other medical specialties that integrate computer technology to improve healthcare, health education and biomedical research.

Health Informatics professionals are in demand as the healthcare system in the U.S. continuously evolves with the advances in technology. The Bureau of Labor Statistics predicts 22-percent growth for jobs in this field by 2022, a rate far faster than average. The field capitalizes on advancing technology such as wearable devices that capture and monitor ECG, pulse, heart rate and other vital signs which will revolutionize our healthcare system. Social media is often an untapped tool that can be used to enhance patient engagement, by answering common questions, sharing healthcare related news, or hosting online related discussion groups.
