Undergraduate and Professional Certificates

A certificate may be used to recognize that a student has completed a defined program of specialized cohesive study consisting of for-credit UF courses, and any other valid additional experience such as internships and international exchanges. Students may earn a certificate in a particular field of study within their academic major, or enhance their major by pursuing a program that complements their major or career interests. Certificates may also be used by non-degree seeking students to pursue personal and academic interests, and to enhance opportunities for employment and admission to graduate and professional schools. Completion of university-approved certificate programs will be noted on student transcripts.

Approval Process

1. Any such organized, for-credit curriculum (including those taken by non-degree-seeking students and offered by self-funded programs) must be approved by the University Curriculum Committee (for undergraduate and professional Certificates) or by the Graduate Council (for graduate Certificates) using the appropriate form on the approval system “approval.ufl.edu”.
2. Changes (including terminations) to certificate programs must be approved by the UCC or Graduate Council.
3. Each certificate application must indicate the CIP Code associated with the program. Departments can only be approved to offer certificate programs that have the same CIP code as their approved degree programs at the same level. For example, to offer an undergraduate certificate, the unit must have approval for an undergraduate major with the same CIP code as the certificate.
4. A program of study that has not been approved by the university cannot be referred to as a certificate program. Documentation for students who complete such a program shall not be referred to as a certificate and may not bear the official UF seal. Such programs may be referred to as “Studies in …”, or, “Certificate of Completion in”. However, such a program shall not include for-credit UF courses. A for-credit program of study must go through the university approval process for certificates.

Requirements for Undergraduate and Professional Certificate Programs

5. Proposals for certificates must include Student Learning Outcomes (SLO’s) and appropriate assessment methods.
6. After a certificate has been approved by the UCC, the Academic Assessment Plan must be submitted through the approval site to the Academic Assessment Committee for approval.
7. Certificate programs which include only for-credit courses shall require the successful completion of at least nine (9) credits of UF courses with a minimum grade of C or S in
each course. An undergraduate certificate shall not require the completion of graduate courses.

8. Professional certificate programs may be based on other educational or training experiences that are not regarded as normal UF coursework. Valid experiences include internships, externships, clinical rotations, or similar training that has been approved by the college’s national professional accreditation agency, the US Department of Education, or similar agency.

9. Each certificate awarded to a student must have at least nine credits that are distinct from every other certificate or minor for that student. That is, certificates must contain at least nine credits of coursework that are unique to that program out of all other certificates and minors awarded to the student.

10. Coursework used to fulfill the requirements of a certificate program may also be used for an undergraduate or professional major.

11. Certificates approved after Spring 2013 shall not have the same name as a major, minor, or concentration, however, the names may include common words. For example, since there is a major and a minor with the name “Mathematics”, no certificate may be named simply “Mathematics” but a new certificate could have the name "Environmental Mathematics", “Mathematics in Action “, or some other name that contains “Mathematics” and other terms. The following certificates have the same names as a major or minor but are exempt from this requirement as they were approved before this policy was created: Geomatics, Teaching English as a Second Language.

12. Students currently enrolled in, or previously awarded a major or minor, cannot enroll in a certificate program that has the same name as the major or minor.

Administration of Undergraduate and Professional Certificates

13. Colleges shall require an application for all students (degree-seeking, non-degree-seeking, or professional) to enroll in a certificate program. The application must be approved by the academic unit offering the certificate and the college dean or the dean’s representative.

14. Certificates awarded after successful completion of an approved program will be posted to the academic transcript. Comments posted to the transcript will be titled “Undergraduate (or Professional) Certificate in....”

15. For an undergraduate certificate to appear on a student’s transcript, the certificate must appear in the catalog for the academic year in which the certificate is awarded, and the student must have passed at least one course in the certificate program after it appeared in the catalog.
16. Effective Summer B 2014, students must be enrolled in a certificate program in order to be awarded the certificate.
17. Students must complete at least 6 credits required for the program after enrolling in the certificate program.
18. Descriptions of approved certificates will be included in the appropriate university publications and websites.
19. Additional information on policies regarding certificates is available at http://www.aa.ufl.edu/policies.
1. Each certificate application must indicate the CIP Code associated with the program. Departments or other units can only be approved to offer certificate programs that have the same CIP code as their approved degree programs at the same level. For example, to offer an undergraduate certificate, the unit must have approval for an undergraduate major with the same CIP code as the certificate.
