

## Proposed Questions for Professionalism Survey

### Purpose

As part of our mission to oversee professional curriculum at UF, the Professional Curriculum Committee is reaching out to our constituents to better define professionalism and what constitutes professional curriculum. Your answers to the questions below will help us to identify common themes that our students explore while participating in professional programs. Please answer this survey once for every professional program maintained by your college.

1. Please list the professional program offered by your college (post-graduate programs not certified by the Graduate School)
2. Does this program list professionalism as a core competency or emphasize professionalism in some way?
  - a. If yes above, please provide a brief explanation of professionalism within the program, and how it is assessed.
3. Does your program engage students in clinical experiences? These can be patient-centered for the health-related programs or leadership/business/legal experience.
  - a. If yes above, please provide a brief explanation of the experience and its placement within your curriculum.
4. Does your program feature an outside accrediting body, or would it be considered as a post-professional program (for those that already have a professional degree or credential)?
5. Does your program require a credentialing exam or licensure during or after completion for graduate to participate in the profession?
6. Do professionals that graduate from your program require continuing education credits or experiences to maintain their qualifications to practice?
