Student-Athlete Enhancement

GATORS EXPERIENCE

Career, community, leadership & personal development initiatives for all student-athletes.

GATORMADE

A holistic player-focused and purpose-driven initiative that develops football scholar-athletes during their time at UF and beyond.

Student Athlete Enhancement

The UAA funds 8 licensed mental health counselors + access to psychiatric services via the UF counseling & wellness center, UF health, and providers in the Gainesville community. The 8 counselors also sit on a UAA Mental Health Committee joined 4 Athletic Trainers, 1 team Physician, and 2 staff members from the Hawkins Center

8 full-time dietitians create high-performance nutrition plans helping all student-athletes reach an elite level of their athletic potential and providing hands-on education in culinary skills and fueling strategies.

EmpowHER

Vicki Werskey
Director of EmpowHER

Gators EmpowHER is a daily initiative to provide opportunities for connection, collaboration, and enrichment for our current and former Gator female athletes. EmpowHER will offer opportunities to provide a network of gator-minded support systems through mentoring, career education, and preparatory events.

EmpowHER Committee

 This is an opportunity for alumni and current female student-athletes to collaborate on new ways to create engagement to continue to empower the network within the Gator community.

Sports Analytics

The UAA and UF are joining forces to develop a future that includes a deeper understanding of sports analytics.

Gator AccelerAltor for Sport Analytics: The College of Health and Human Performance and the Warrington College of Business will partner with the UF's men's basketball team to improve recruitment, player evaluation, scouting, and game strategy through artificial intelligence (AI) tools. The project will also develop a master's degree program in AI and Sports Analytics, and provide students with a real-world laboratory for working directly with teams and athletes. (Brian Levine and Scott Friedman)

Al-Powered Athletics: The Herbert Wertheim College of Engineering, the College of Health and Human Performance, and the UAA will build an infrastructure to enable Al-powered athletics based on the wearable sensor and health data of student-athletes. Funded projects may generate pilot data and initial publications that lead to large-scale research proposals for federal agencies. (Stacey/Duke/Spencer)
