**HOW THIS COURSE RELATES TO THE STUDENT LEARNING OUTCOMES IN THE FIRE EMERGENCY SERVICES PROGRAM:** Properly address issues of management, code regulations, and the labor market in fire and emergency services.

**TEACHING PHILOSOPHY:** I am expecting students to demonstrate a working knowledge of the subject. You need to be creative when you complete your assignments, but your written work should reflect professionalism. Your work needs to be complete and written in such a manner that someone can pick up your document and understand what you are trying to convey. Most of all, your work needs to be supported with research and cited properly in APA format.

**INSTRUCTIONAL METHODS:** The course is designed for individual and group interactivity. It is important to post and respond to discussion questions in the course within the time frame allotted. This provides a learning environment by enabling you to network with other students in the course. The assignments are individual-based to give you the opportunity to do a variety of activities, in many cases, similar to what you will be doing in your role as a leader in the emergency services profession.
COURSE POLICIES:

ATTENDANCE POLICY: The course is designed in module format. You should check the site at least once a week. You are required to complete the assignments, including discussion questions, within the time period designated on the module. There will be meetings set up throughout the course.
