

University Curriculum Committee Program and Course Recommendations

[May 16, 2023]

BULK PREREQUISITE REQUESTS

All bulk prerequisite requests will be Conditionally approved pending further review during the summer

3. Bulk Request of Prerequisite for the College of Agriculture and Life Sciences 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18534>
 - Comments:
 - Pending further review
 - FOR3434C For Resource Info Sys MAC 1105 or MAC 1140
 - Natural Resources and Environment's environmental science degrees require this course and require a higher level or math. Recommend those courses be added or "or higher math level".
 - Co-requisites are not enforceable and should not be included in this request. Please correct the following to have prerequisites:
 - ANS3006 Intro Animal Science Co-requisite BSC 2005 or BSC 2010
 - ANS4231 Practicum Horse Manag Co-requisite ANS 3006
 - SWS3022L Intro Soils Envir Lab Co-requisites SWS 3022 & BSC 2005 or BSC 2010
 - WIS3402 Wildlife of Florida Co-requisites BSC 2011/2011L
 - WIS3402L Wildlife Florida Lab Co-requisites BSC 2011/2011L

4. Bulk Request of Prerequisite for the College of the Arts 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18522>
 - Comments:
 - Pending further review

5. Bulk Request of Prerequisite for the College of Design Construction and Planning 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18525>
 - Comments:
 - Pending further review
 - ~~LAA4356: Environmental Planning Design Studio~~ LAA 3350
 - ~~There is a LAA 3350C, but not a LAA 3350, please confirm and update the excel file if the C course is intended to be a prereq.~~ Updated, 5/15/23.
 - ~~LAA4940: Landscape Architecture Internship~~ LAA4940

- ~~The proposed prerequisite is the same as the course, please correct.~~
Updated.

6. Bulk Request of Prerequisite for the College of Health and Human Performance 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18524>
 - Comments:
 - Pending further review
 - Registrar will adjust to “sophomore standing or higher”
7. Bulk Request of Prerequisite for the College of Journalism and Communications 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18507>
 - Comments:
 - Pending further review
8. Bulk Request of Prerequisite for the College of Liberal Arts and Sciences 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18494>
 - Comments:
 - Pending further review
 - Please clarify “critical tracking semester”.
 - The registrar has prereqs based on semesters taken. Is this meant to be a specific semester? Or a new critical tracking prerequisite. Recommend speaking with Catalog team in Registrar.
9. Bulk Request of Prerequisite for the College of Public Health and Health Professions 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18509>
 - Comments:
 - Pending further review
10. Bulk Request of Prerequisite for the College of Education 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18558>
 - Comments:
 - Pending further review
11. Bulk Request of Prerequisite for the Herbert Wertheim College of Engineering 3/4000-Level Courses [CA]
 - <https://secure.aa.ufl.edu/Approval/reports/18564>
 - Comments:
 - Pending further review

PROGRAMS

12. Modification of the BA to the Economics Major in the College of Liberal Arts and Sciences [CA]

- <https://secure.aa.ufl.edu/Approval/reports/18437>
- Summary:
 - Adding residency requirement. Require majors to complete a minimum of 15 of the required 23-24 credits of 3000/4000 level coursework at UF. In practice, this would allow students to complete a maximum of two intermediate or advanced major courses at another institution.
- Comments:
 - Pending discussion of residency requirements and Articulation Agreement for state of Florida.
 1. Please describe your current transfer admissions process with respect to circumstances in which students have earned an AA and additional advanced credit required for the degree. Please note that SUS institutes are bound to the state articulation agreement and associated statutes
http://www.leg.state.fl.us/Statutes/index.cfm?App_mode=Display_Statute&Search_String=&URL=1000-1099/1007/Sections/1007.25.html;
http://www.leg.state.fl.us/Statutes/index.cfm?App_mode=Display_Statute&Search_String=&URL=1000-1099/1007/Sections/1007.24.html;
http://www.leg.state.fl.us/Statutes/index.cfm?App_mode=Display_Statute&Search_String=&URL=1000-1099/1007/Sections/1007.23.html). Specifically:
 - (12) A student who received an associate in arts degree for successfully completing 60 semester credit hours may continue to earn additional credits at a Florida College System institution. The university must provide credit toward the student's baccalaureate degree for an additional Florida College System institution course if, according to the statewide course numbering, the Florida College System institution course is a course listed in the university catalog as required for the degree or as prerequisite to a course required for the degree.

[In discussion with Dr. Knight, this request involves students who apply to transfer to UF from an out-of-state institution. FCS institutions do not typically offer 3xxx/4xxx-level economics courses. Note that programs can deny considering a transfer application from a student who as earned more than 60 credits

hours. Also note that programs cannot require students to re-take coursework at UF if they have completed it successfully prior to application to UF.]

2. Would not considering transfer applications submitted by students who have earned more than 60 credit hours resolve the motivating concern for this request? Does UF's residence requirement already meet the intended outcome of this request?

13. Proposed Combination Degree Between the BA/BS and the MA in Anthropology ~~[CA]~~[A]

- <https://secure.aa.ufl.edu/Approval/reports/17438>

- Comments:

~~○ Please clarify the references to “certificates” in the justification.~~

1. ~~The proposal seems to imply that students will earn a Bachelor's degree, an MA, and a certificate. Please provide more information regarding the certificate.~~ Under review is a new graduate certificate in Public Archaeology (17733), which is on the agenda for Graduate Council this month. The combination degree request is part of a much broader initiative by Department of Anthropology to offer terminal Masters degrees in archaeology to address the growing demand for MA-level trained archaeologists in public archaeology. Other certificates of specialties within public archaeology are in the offing. Email, 5/9/23.
2. ~~Will students be able to opt into a certificate or must every student chose one?~~ All students are expected to earn a graduate certificate in Public Archaeology or one of the others (Indigenous Archaeology, Biocultural Heritage) in the works. All are paired with paid internships the last graduate semester in the public-sector, with tribes, or with government agencies that are good career options commensurate with training.
3. ~~Are the certificates the same as a concentration?~~ No, the certificates are designed expressly for professional training with last-semester paid internships leading to professional employment in public archaeology

CERTIFICATES

14. NEW UNDERGRADUATE CERTIFICATES

- None.

15. CHANGES TO EXISTING CERTIFICATES

- **Proposed Modifications to the Agroecology and Sustainable Food Systems Certificate (CALs) [A]**
 - <https://secure.aa.ufl.edu/Approval/reports/18054>
 - Summary:
 - Adding elective course options.
 - Comments:
 - Previously recycled, comments have been addressed.

COURSE RECOMMENDATIONS

16. PROPOSED NEW UNDERGRADUATE COURSES

Approved	Conditionally Approved	Recycle
CRW 4XXX- Creative Nonfiction	GEO 3XXX- International Wildlife Policy: Lessons from Africa

GEO 4700- Transportation Geography		
REL 2XXX- Indigenous Religions of the World		
IHS 4XXX- Pre-Health Post-Bac (PHPB) Capstone		

Liberal Arts and Sciences

A. CRW 4XXX- Creative Nonfiction

[A]

- <https://secure.aa.ufl.edu/Approval/reports/18377>
- Comments:
 - None

B. EUS 493X- JMCE Seminar: EU in Practice

[CA][A]

- <https://secure.aa.ufl.edu/Approval/reports/18100>
- Comments:
 - ~~Please provide more detail regarding what “new course code” is being requested. Is this an existing course needing a new name/number?~~
 - ~~Is this related to request #18484? EUS493X was the new course request that we talked about a couple of months ago in UCC, and there was concern about using the name Jean Monnet since it is indirectly a funding agency. After consultation back and forth with Angela, we settled on JMCE in the title as fulfilling the needs of the funding agency while also respecting the provost’s concerns about “buying” courses.~~
 At the same time, though, we realized that there was another course already on the books, EUS4932, that used the name Jean Monnet. In order to be consistent and allay all fears, we were told that that course needed to remove the name Jean Monnet and replace it with JMCE. That course has existed for years, it’s just changing that part of the title to be in alignment with those conversations. That’s that request – no other changes.

- C. GEO 3XXX- International Wildlife Policy: Lessons from Africa [R]
- <https://secure.aa.ufl.edu/Approval/reports/18193>
 - Comments:
 - Consult uploaded from CALS.
 - Please update late work policy to be in line with UF policy:
<https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/#absencestext>

- D. GEO 4700- Transportation Geography [R][A]
- <https://secure.aa.ufl.edu/Approval/reports/18409>
 - Comments:
 - Recommend consults with URP, DCP. **Uploaded, 5/5/23**
 - ~~Please revise the grade dispute policy as students are allowed a reasonable amount of time during the course of the semester to discuss grade disputes.~~ **Updated.**
 - **Syllabus states: Grade disputes:** Should a student wish to dispute any grade received in this class (other than simple addition errors), the dispute must be in writing and be submitted to the instructor within a week of receiving the grade. The dispute should set out very clearly, the grade that the student believes the assignment should have received as well as why he or she believes that he or she should have received such a grade.

- E. IHS 2XXX- Pre-Health Post-Bac (PHPB) Professional Development [CA]
- <https://secure.aa.ufl.edu/Approval/reports/17440>
 - Comments:
 - Recommend consulting with professional programs for support of this course. **Nursing and HHP consults part of original request, waiting for PHHP (still). Since restricted to PHPB students only, this usually isn't an issue since it doesn't impact undergraduate students in any college.**
 - ~~This course seems as if it would be popular with undergrad pre-professional students as well.~~ **IHS1100 Introduction to the Pre-Health Process does mirror this course and is for undergraduates only.**
 - ~~Why is this post-bac course limited to pre-med and 2000 level? See above.~~ **2000 level because it's postbac but introductory – open to other suggestions.**
 - ~~Please provide more information regarding the need to offer this course.~~ **Pre-Health Post-bac (PHPB) students are non-traditional students returning to UF for the opportunity to take the required pre-requisite courses for admission to healthcare graduate professional schools -**

medical, dental, veterinary, Physician Assistants, pharmacy, etc. The PHPB Professional Development course provides the knowledge and skills needed to become well prepared and excellent applicants for admission. Students gain knowledge of professional school admission requirements, engage in a process of self-assessment and self reflection in the context of personal and professional growth related to professional identity formation, and develop a professional development plan for the two year span of PHPB to intentionally build an individualized and competitive application. Email, 5/9/23

F. IHS 4XXX- Pre-Health Post-Bac (PHPB) Capstone

[CA][A]

- <https://secure.aa.ufl.edu/Approval/reports/17443>
- Comments:
 - Recommend consulting with professional programs for support of this course. Nursing consult part of original request, waiting for others HHP consulted submitted; PHHP consult requested without response. Since restricted to PHPB students this usually isn't an issue since it doesn't impact undergraduate students in any college. Email, 5/9/23.
 - 5/11/12: PHHP responded with final approval. HHP approved as well.
 - ~~This prereq LAS_PB4 LAS PostBac Med School Prereq, seems to suggest that this is a course for pre-med students. However, in the description, it states that this course is for pre-health professions students. The materials/readings seem MD focused. Is this course for all pre-health professions students or just pre-med? The course is for the prehealth postbac, the vast majority of whom are applying to medical schools. Again, the course is ONLY for that postbac cohort and is not open to bachelor's students. This is the nature of the program as it was developed in consultation with CLAS leadership. PHPB admits students to pursue the courses for application to med, dental, veterinary, PA and pharmacy. The majority of the students are pre-med. The content of the course applies to all of those listed.~~
 - ~~Would non-post bac pre-professional students benefit from taking the course? There are similar courses offered for bachelor's degree students through B120 and other units.~~

- ~~Please provide more information regarding the need to offer this course. This was updated and submitted in the request.~~ This course is for students in the Pre-Health Post-Bac (PHPB) program. <https://phpb.clas.ufl.edu/>. PHPB is for non-traditional post-bac students who completed a non-science undergraduate major to complete the pre-requisite science courses for admission to healthcare professional schools (medical, dental, PA, pharmacy, veterinary). The PHPB Capstone course is offered in the last semester of the program and culminates in a process self-assess of the professional/personal development done by PHPB students to assess competitiveness for application to healthcare professional schools. The course provides engagement, assessment, self-reflection of the professional development plan implemented in the 'PHPB Professional Development' course and its reflective summation for application content, bringing together the PHPB program as a whole. Through a process of engagement, reflection and assessment with the pre-professional core competencies (<https://www.aamc.org/services/admissions-lifecycle/competencies-entering-medical-students>) PHPB students are well prepared to move forward beyond PHPB and the application process.

[CA] [A]

- <https://secure.aa.ufl.edu/Approval/reports/18390>
- Comments:
 - ~~Is each counted quiz 10% of the final grade or 10% of the total grade? Please provide more information or clarify the grading.~~ Each counted quiz is 10% of the total grade. I drop the lowest quiz score, so I count only 6 of the 7 quizzes that are given. Each counted quiz is 10%, therefore the best 6 quizzes count for 60% of the total grade. The remainder 40% of the total grade comes from the comprehensive final exam. Email response, 5/9/23.

Engineering

I. ECH 4323L- Chemical Engineering Laboratory 5

[R][A]

- <https://secure.aa.ufl.edu/Approval/reports/18151>
- Comments:
 - Students are not required to provide a phone number in their emails to the instructor. The requirement to provide a phone number has been removed. Updated 5/12/23

- ~~Please provide a weekly topic/schedule of topics. It appears that a list of experiments is provided rather than a 15-week outline.~~ Actually, there are only 14 weeks both spring and fall semesters. The class is taught only Thursdays and we lose one week in Fall semesters due to Thanksgiving and a week in Spring semesters due to the Spring Break. Furthermore, there are no Thursdays during week 15 as Wednesdays are the last days of class. The list of activities has been modified to clearly show what happens every week for 14 weeks.

- ~~Are there published readings assigned or are the only readings “instructor notes”?~~ There are no published readings. The class notes are Powerpoint slides.

- ~~What is the penalty if students have “frequent” absences without attending the next office hour? What constitutes a “frequent” absence? Please be sure that accommodations consistent with UF attendance policy are made for a student who is unable to attend the next office hour for an excused reason.~~ Visiting office hours never worked well and the pertinent passage has been removed from the syllabus. In the revised syllabus, if the students have unexcused absences, their attendance grade will decrease in proportion to their unexcused absences.

- ~~How are attendance and participation assessed for the 5%?~~ The instructor personally returns in class the graded weekly lab reports. So, he knows who is missing class. Originally the Syllabus stated that a base grade of 88 is multiplied by the fraction of times the student was present in class. This statement has been modified by adding “or had excused absences”. There are 10 weeks of non-introductory activities with associated lab reports so every unexcused absence will reduce the 88 by 8.8 points. For participation, we are talking about 12% of 5% of the overall points, which is less than 1% of the overall points. It is such a small amount of the grade that precision is not necessary. The instructor asks frequent questions during the 3-hour lab experiments and as he gets to know participating students rather fast, he knows who is participating a lot or never. Top participants may get 12 points (raising the attendance and participation grade to 100 for those with no unexcused absences); frequent participants will raise it to 95 and occasional participants will raise it to 90.

- ~~Please provide more detail regarding the Final Controller Design Contest that is part of the course grade.~~ The main objective of the class is to teach the students how to design feedback controllers, devices that maintain processes at desired conditions (e.g., desired reactor temperatures) when the environment changes (e.g., reactor feed composition and temperature may be changing). In their experimental kits their algorithm automatically changes the output heat of a resistance heater with objective to follow changes in the desired temperature of a water-filled can or to correct for the effects of cooling fans turning on or off. During the semester they learn different design methods and after every design they run a 30-minute test experiment that gave a score on how well their design did. The test always has the same things happening, e.g., at a certain time the desired temperature would increase by 5 degrees or the fans would turn off etc. For the final the students have a 60-minute test that has changes that they do not know ahead of time. They are to bring their best design and see how well it performs. A scale is provided that translates the score of the test to a 0-100 grade scale.

J. ECH 4934- Professional Seminar

[R][A]

- <https://secure.aa.ufl.edu/Approval/reports/18393>
- Comments:
 - ~~Should this be a new course proposal?~~ No, since there are no substantial changes to the course content. The proposed changes to the course level and the course description are aimed to ensure that they are consistent with the current course content. The students are expected to take the course during their 3rd semester, as indicated in the Model Semester Plan; this course is a co-requisite to ECH 3023 (Material and Energy Balances), which is the first Chemical Engineering course taken by the undergraduate students. Email response, 5/12/23.
 - ~~Is the material taught in the course now going to be taught at a more introductory level? What about the course is changing to reduce the level from 4000 to 2000?~~ The course material will be taught at the same level as before, since the course material does not require advanced knowledge. Historically, the course was taken by senior students, which is why it has the 4000 level. However, this course is more useful to more junior students and it was moved to Semester 3 of the Model Semester Plan. The proposed change in the course level reflects this change.

- ~~The title of Professional Seminar conveys a higher level of course material than what it appears the course will now be.~~
 1. ~~Recommend consideration of more specific title such as Careers in Chemical Engineering.~~ The course has two components, namely an overview of careers in Chemical Engineering, as well as a professional development component (resume writing, interviewing, oral presentations, etc.). Therefore, "Careers in Chemical Engineering" would not fully reflect the course content and we propose the following alternative course title: "Professional Development of Chemical Engineers".
- ~~What is the value of each graded assignment? Grading scheme lists value for the category of assignment only.~~ Each assignment has a different value, depending on effort required to complete it. The values of individual assignments are posted on Canvas. A statement has been added to the syllabus to clarify this.
- Please update the Honor code section of syllabus (no longer mandatory reporting of violations). ~~The Honor Code section has been updated.~~
