

Ashley Ghiaseddin, MD

I joined the Gator Nation in 2015, after completing my fellowship at Duke University. I am continuously amazed with the warm 'family atmosphere' that is cultivated at UF. I have enjoyed my time on the University Multi-Cultural Mentoring Program and enjoy having Undergraduates spend time in our clinic. After serving on the Medical Student Interviewing Committee, I was invited to join the Medical School Admissions Committee this past Academic Year. I am involved with translational research at the UF Brain Tumor Immunotherapy Program where I am grateful to work with amazing Research faculty and students across different Colleges. I am currently in my second term on Faculty Senate and I have served as chair of the Committees on Committees as well as the current chair of the Budget Council. Sustained growth and success for the University are dependent upon its Faculty and Students. If elected as your chair, I will focus my efforts to improve Faculty retention by closely evaluating the benefits packages and P&T process. I will specifically work on improving the retirement and healthcare plans for our Faculty as well as the teaching evaluations for faculty working with students and Postdocs. I can promise you that I understand the concerns of the faculty at large. I have spent this past year as the President of the Faculty Council for the College of Medicine and I will serve you with honesty and integrity.

I appreciate the consideration to serve as your Chair. Go Gators!
