

**Preamble:**

The Faculty Senate of the University of Florida endeavors to work with the Board of Trustees to ensure the proper succession of the Presidency of the University. In doing so, the Senate must consider the well-being of all students, faculty, and staff in addition to the numerous intensive responsibilities that come with being an effective President of an R1 research institution. The next President should come already equipped to lead an institution of this caliber rather than aiming to learn on the job. Anything less will result in a lack of faith in leadership. The process of the thirteenth Presidential search, conducted in accordance with the updated Florida State Bill 520, has undermined the trust and confidence of the University of Florida Faculty Senate in the selection of the sole finalist Dr. Ben Sasse.

**Resolution:**

Whereas the thirteenth University of Florida Presidential Search was conducted in accordance with SB 520 and a sole finalist was selected and presented to the University at large;

Whereas at the Faculty Senate meeting at the University of Florida on October 20, 2022, Senate members were informed that multiple well-qualified candidates who are leaders at higher education institutions were unwilling to be publicly named as co-finalists;

Whereas the selection process has prevented the University of Florida Faculty as a whole from being informed about other candidates and their qualifications for the job;

Whereas the Presidential Search Committee included three faculty members who were not able to confer with the Faculty Senate and therefore, did not fairly represent the University Faculty body in the final selection outcome.

Be it resolved that the Faculty Senate of the University of Florida provides a vote of NO CONFIDENCE in the selection process of the thirteenth President of the University of Florida.
